Authorised Corporate Director's Report

The Authorised Corporate Director (ACD) of M&G Global Dividend Fund presents its Annual Long Report and audited Financial Statements for the year ended 31 March 2022.

Please note that we have included an explanation of key investment terminology in the 'Glossary' (at the back of this report).

Company information

This Open-Ended Investment Company (OEIC) is an Investment Company with Variable Capital (ICVC) incorporated under the Open-Ended Investment Companies Regulations 2001. It is authorised and regulated by the Financial Conduct Authority (FCA) under the Financial Services and Markets Act 2000. The Company is a UK UCITS (Undertakings for Collective Investment in Transferable Securities) scheme as defined in the Collective Investment Schemes sourcebook, as issued (and amended) by the FCA.

The Company was authorised on 9 July 2008 and the fund was launched on 18 July 2008.

The Company's principal activity is to carry on business as an OEIC.

A shareholder is not liable for the debts of the Company and will never be liable to make any further payment to the Company after paying the purchase price of the shares.

Fund manager

Annual value assessment

An annual assessment report is available which shows the value provided to investors in each of M&G's UK-based funds. The assessment report evaluates whether M&G's charges are justified in the context of the overall service delivered to its investors. The report can be found at www.mandg.co.uk/valueassessment

Authorised Corporate Director's Report

Important information

The COVID-19 pandemic has been an unprecedented event and continues to bring uncertainties. The ACD continues to monitor the ongoing operational risks that are posed to the Company and its service providers.

The events currently unfolding in Ukraine are shocking and tragic. Although feared, a full-scale military invasion of Ukraine by Russia was arguably not expected and has been widely condemned. Western nations have responded to Russia's attack which started on 24 February 2022, with sweeping sanctions: the US, the UK and the European Union have imposed sanctions on Russian banks, state-owned enterprises (SOEs) and individuals with close links to President Putin. On 28 February 2022, Russia's central bank closed stock trading on the Moscow Stock Exchange. Whilst restrictions and sanctions are still in place, there was a partial reopening of the Exchange on 24 March 2022.

From the perspective of financial markets, Russia's attack has sparked considerable volatility, with Russian assets, in particular, falling sharply and oil prices surging. Given the uncertainty around the continuing conflict, it is likely that financial markets will remain volatile in the coming weeks and months as investors react to developments.

In this uncertain fast-moving environment, please be aware that investment commentary may become quickly outdated by ongoing events. We will continue to monitor the geopolitical situation closely.

Please refer to the 'Investment review' section for further details on significant events during the period.

From 27 April 2022, the M&G Investments Thermal Coal Investment Policy has been applied. For further information, investors should refer to the Prospectus or the 'M&G Investments Thermal Coal Investment Policy' document which is available on the M&G website at www.mandgplc.com/sustainability/environment/coal

Authorised Corporate Director's Report

Authorised Corporate Director's Responsibilities

The Authorised Corporate Director (ACD) is required to prepare annual and interim long reports for the Company. The ACD must ensure that the financial statements, contained in this report, for the Company are prepared in accordance with the Investment Association Statement of Recommended Practice for Financial Statements of UK Authorised Funds (SORP) and UK Financial Reporting Standards, and give a true and fair view of the net revenue or expenses and net capital gains or losses for the accounting period, and the financial position at the end of that period.

The ACD is required to keep proper accounting records, and to manage the Company in accordance with the Collective Investment Schemes sourcebook, as issued (and amended) by the FCA, the Instrument of Incorporation and the Prospectus, and to take reasonable steps for the prevention and detection of fraud or other irregularities. Additionally, the ACD is responsible for preparing the financial statements on a going concern basis unless it is appropriate to presume that the Company will not continue in operation.

Directors' statement

This report has been prepared in accordance with the requirements of the Collective Investment Schemes sourcebook, as issued and amended by the Financial Conduct Authority.

M&G Securities Limited
19 May 2022

Depository's Responsibilities and Report

Statement of the Depository's Responsibilities and Report of the Depository to the Shareholders of M&G Global Dividend Fund ('the Company') for the year ended 31 March 2022

The Depository must ensure that the Company is managed in accordance with the Financial Conduct Authority's Collective Investment Schemes sourcebook, the Open-Ended Investment Companies Regulations 2001 (SI2001/1228) (the OEIC Regulations), as amended, the Financial Services and Markets Act 2000, as amended, (together 'the Regulations'), the Company's Instrument of Incorporation and Prospectus (together 'the Scheme documents') as detailed below.

The Depository must in the context of its role act honestly, fairly, professionally, independently and in the interests of the Company and its investors.

The Depository is responsible for the safekeeping of all custodial assets and maintaining a record of all other assets of the Company in accordance with the Regulations.

The Depository must ensure that:

- the Company's cashflows are properly monitored and that cash of the Company is booked into the cash accounts in accordance with the Regulations;
- the sale, issue, redemption and cancellation of shares are carried out in accordance with the Regulations;
- the value of shares in the Company is calculated in accordance with the Regulations;
- any consideration relating to transactions in the Company's assets is remitted to the Company within the usual time limits;
- the Company's income is applied in accordance with the Regulations; and
- the instructions of the Authorised Fund Manager ('the AFM') are carried out (unless they conflict with the Regulations).

The Depository also has a duty to take reasonable care to ensure that the Company is managed in accordance with the Regulations and the Scheme documents in relation to the investment and borrowing powers applicable to the Company.

The financial statements have been prepared on the going concern basis unless it is inappropriate to presume that the fund will continue in operation.

Having carried out such procedures as we consider necessary to discharge our responsibilities as Depository of the Company, it is our opinion, based on the information available to us and the explanations provided, that in all material respects the Company, acting through the AFM:

- i) has carried out the issue, sale, redemption and cancellation, and calculation of the price of the Company's shares and the application of the Company's income in accordance with the Regulations and the Scheme documents of the Company, and
- ii) has observed the investment and borrowing powers and restrictions applicable to the Company.

Independent Auditor's Report

Independent Auditor's Report to the shareholders of M&G Global Dividend Fund

Opinion

We have audited the financial statements of M&G Global Dividend Fund ("the Company") for the year ended 31 March 2022, which comprise the Statement of Total Return, the Statement of Changes in Net Assets Attributable to Shareholders, the Balance Sheet, the related notes and the Distribution Tables, and the accounting policies of the Company, which include a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards including FRS 102 'The Financial Reporting Standard applicable to the UK and Republic of Ireland' (United Kingdom Generally Accepted Accounting Practice).

In our opinion, the financial statements:

- give a true and fair view of the financial position of the Company as at 31 March 2022, and of the net revenue and the net capital gains on the scheme property of the Company for the year then ended; and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report below. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the Financial Reporting Council's (the "FRC") Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the Authorised Corporate Director's ("the ACD") use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of 12 months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the ACD with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Company's ability to continue as a going concern.

Other information

The other information comprises the information included in the Annual Report other than the financial statements and our auditor's report thereon. The ACD is responsible for the other information contained within the Annual Report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

Independent Auditor's Report

We have nothing to report in this regard.

Opinions on other matters prescribed by the rules of the Collective Investment Schemes Sourcebook of the Financial Conduct Authority (the "FCA")

In our opinion:

- the financial statements have been properly prepared in accordance with the Statement of Recommended Practice relating to Authorised Funds, the rules of the Collective Investment Schemes Sourcebook of the FCA and the Instrument of Incorporation; and
- there is nothing to indicate that adequate accounting records have not been kept or that the financial statements are not in agreement with those records; and
- the information given in the ACD's report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Matters on which we are required to report by exception

We have nothing to report in respect of the following matter in relation to which the rules of the Collective Investment Schemes Sourcebook of the FCA requires us to report to you if, in our opinion:

- we have not received all the information and explanations which, to the best of our knowledge and belief, are necessary for the purposes of our audit.

Responsibilities of the ACD

As explained more fully in the ACDs' responsibilities statement set out on page 3, the ACD is responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the ACD determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the ACD is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the ACD either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

Independent Auditor's Report

Our approach was as follows:

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the Company and determined that the most significant are United Kingdom Accepted Accounting Practice (UK GAAP), the Investment Association's Statement of Recommended Practice (IMA SORP), the FCA Collective Investment Schemes Sourcebook, the OEIC Regulations, the Company's Instrument of Incorporation and the Prospectus.
- We understood how the Company is complying with those frameworks through discussions with the ACD and the Company's administrator and a review of the Company's documented policies and procedures.
- We assessed the susceptibility of the Company's financial statements to material misstatement, including how fraud might occur by considering the risk of management override, specifically management's propensity to influence revenue and amounts available for distribution. We identified a fraud risk with respect to the incomplete or inaccurate income recognition through incorrect classification of special dividends and the resulting impact to amounts available for distribution. We tested the appropriateness of management's classification of material special dividends as either a capital or revenue return.
- Based on this understanding we designed our audit procedures to identify non-compliance with such laws and regulations. Our procedures involved review of the reporting to the ACD with respect to the application of the documented policies and procedures and review of the financial statements to test compliance with the reporting requirements of the Company.
- Due to the regulated nature of the Company, the Statutory Auditor considered the experience and expertise of the engagement team to ensure that the team had the appropriate competence and capabilities, which included the use of specialists

where appropriate, to identify non-compliance with the applicable laws and regulations.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at <https://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

Use of our report

This report is made solely to the Company's shareholders, as a body, pursuant to Paragraph 4.5.12 of the rules of the Collective Investment Schemes sourcebook of the Financial Conduct Authority. Our audit work has been undertaken so that we might state to the Company's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

Ernst & Young LLP
Statutory Auditor

Authorised Corporate Director's Report

Investment objective

The fund has three aims:

- To deliver an income stream that increases every year.
- To deliver a yield above that available from the MSCI ACWI Index over any five-year period.
- To deliver a higher total return (the combination of income and growth of capital) than that of the MSCI ACWI Index over any five-year period.

Investment policy

At least 70% of the fund is invested in a range of global equities. The fund may invest across a wide range of geographies, sectors and market capitalisations. The fund may also invest in collective investment schemes, other transferable securities, cash, near cash, other money market securities, warrants and derivatives. The fund's exposure to global equities may be gained through the use of derivatives. Derivatives may be used for efficient portfolio management.

Investment approach

The fund manager employs a bottom-up stockpicking approach, driven by the fundamental analysis of individual companies. The fund manager seeks to invest in companies with excellent capital discipline and the potential for long-term dividend growth. The fund manager believes rising dividends create upward pressure on the value of shares. Dividend yield is not the primary consideration for stock selection.

The fund manager aims to create a diversified portfolio with exposure to a broad range of countries and sectors. The fund manager selects stocks with different drivers of dividend growth to construct a portfolio that has the potential to cope in a variety of market conditions. The fund invests with a long-term view of typically three to five years. When attempting to grow distributions, the fund manager's main focus is on delivering an increase in sterling terms.

Benchmark

Benchmark: MSCI ACWI Index.

The fund is actively managed. The benchmark is a target which the fund seeks to outperform. The index has been chosen as the fund's target benchmark as it best reflects the scope of the fund's investment policy. The target benchmark is used solely to measure the fund's performance and income objective and does not constrain the fund's portfolio construction.

For unhedged share classes, the benchmark is shown in the share class currency.

Risk profile

The fund invests globally in the shares of companies and is, therefore, subject to the price volatility of the global stockmarket and the performance of individual companies. The fund may also be subject to fluctuations in currency exchange rates. The fund's focus is on shares of companies that have the potential to grow their dividends over the long term. Income distributions from the fund's holdings, however, are not guaranteed and may vary. Diversification across industries and market capitalisation is key in managing liquidity risk and reducing market risk. The fund's risks are measured and managed as an integral part of the investment process.

Authorised Corporate Director's Report

The following table shows the risk number associated with the fund and is based on Sterling Class 'A' shares.

The above number:

- is based on the rate at which the value of the fund has moved up and down in the past and is based on historical data so may not be a reliable indicator of the future risk profile of the fund.
- is not guaranteed and may change over time and the lowest risk number does not mean risk free.
- has not changed during this period.

Investment review

As at 1 April 2022, for the year ended 31 March 2022

Distribution summary

Over the 12-month review period to 1 April 2022, the fund distributed income of 7.4640 pence per Sterling Class 'A' (Income) share. This is 5.1% higher than the distribution for the previous financial year. The payout represented a yield (distributed income as a percentage of the share price as at 1 April 2022) of 2.77% versus a yield of 1.92% for the MSCI ACWI Index, the fund's target benchmark.

Despite the severe pressure on economic activity in the immediate aftermath of the pandemic, corporate cashflows have improved quickly, with the result that dividends and dividend growth have been restored widely as a signal of future confidence. (Dividends represent a share in the profits of a company and are paid out to the company's shareholders at set times of the year.)

The fund benefited from this backdrop, with higher dividends from a broad range of countries and sectors. The majority of holdings delivered dividend increases in

the region of 5-15% in local currency, in line with previous years. There were no dividend cuts.

Technology continued to provide a source of robust dividend growth, with semiconductor companies KLA Corp, Broadcom, Analog Devices and Taiwan Semiconductor Manufacturing Company (TSMC) reporting double-digit increases. ASML accounted for the biggest increase after doubling its payment. Microsoft extended its long track record of dividend growth with an 11% uplift, while Visa raised its dividend by 17% in digital payments.

Financials provided another source of strong dividends, led by BlackRock, which accelerated its pace of dividend growth to 18% from 14% in the previous year. Intact Financial and S&P Global raised their dividends by 10%, while Charles Schwab reported an 11% increase.

Healthcare delivered reliable growth among defensive sectors, with double-digit increases from Anthem and Bristol Myers Squibb. (Defensive stocks are companies that tend to have stable earnings and are less affected by peaks and troughs in the economy.) PepsiCo and Coca-Cola raised their dividends by 5% in consumer staples.

It was also encouraging to see some of the dividend cutters from the previous year resume dividend growth. In materials, Trinseo improved its balance sheet to the extent that the company could accommodate a higher cash return to shareholders. The dividend was increased by a multiple of four. Methanex, which reduced its dividend to retain financial flexibility in the wake of COVID, raised its dividend more than threefold, reflecting a positive outlook for the methanol industry.

It was not all good news, however, as Keyera (energy), abrdn (financials) and Takeda Pharmaceutical (healthcare) held their dividends flat. The full-year dividend for Treasury Wine Estates also remained unchanged despite a significant boost to the final payment. We expect all four companies to return to dividend growth at the appropriate time.

Authorised Corporate Director's Report

That said, static dividends were the exception rather than the rule. We are encouraged that the majority of the fund's holdings delivered solid, and in many cases impressive, dividend growth, as a result of which the fund increased its distribution during the 12-month review period, while maintaining a yield above that of the MSCI ACWI Index. We are conscious that the combination of a premium yield and rising income is important to many of our investors. We remain focused on meeting this objective.

Performance against objective

Between 1 April 2021 (the start of the review period) and 1 April 2022, the M&G Global Dividend Fund delivered a positive total return (the combination of income and growth of capital) across all its share classes and outperformed its benchmark, the MSCI ACWI Index, which returned 12.6% in sterling. The fund therefore met its objective of outperforming the MSCI ACWI Index over this short timeframe. The fund also delivered on its income objectives of increasing the income stream and providing a higher yield than the MSCI ACWI Index.

Over five years, the fund's sterling share classes delivered positive total returns, but underperformed the MSCI ACWI Index, which returned 11.2% pa in sterling. Distributions increased in each financial year during this time and the fund's yield remained at a consistent premium to the benchmark. Consequently, the fund achieved two of its three objectives over this longer timeframe.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Performance review

Global stockmarkets rose during the 12 months under review, with the MSCI ACWI Index reaching an all-time high in November before retreating from its peak as concerns about inflation were exacerbated by geopolitical risk culminating in Russia's invasion of Ukraine. The US led the gains as the major indices – the S&P 500 Index, Dow Jones Industrial Average and Nasdaq Composite – touched new highs. Europe

delivered a positive return, but did not keep up with the MSCI ACWI Index. Japan posted a negative return. Asia Pacific ex Japan and emerging markets led the laggards as China floundered on regulatory pressure aimed at the internet giants of Alibaba and Tencent.

Energy was the standout sector as the oil price exceeded \$100 per barrel and natural gas prices spiked. Financials and materials also outperformed among the more economically sensitive areas of the market, but industrials underperformed. Healthcare and utilities led the gains among defensive sectors. Technology outperformed as the strength in semiconductors and hardware offset the relative weakness in software. Communication services brought up the rear as Meta Platforms, formerly Facebook, slumped. Consumer discretionary underperformed as Amazon.com struggled in a rising market.

Against this backdrop, the fund generated a positive return and outperformed the MSCI ACWI Index. Sector allocation added value, helped by an overweight position relative to the benchmark in energy and an underweight relative to the benchmark in communication services.

Methanex made the biggest contribution to fund performance as the shares jumped 45% in US dollars, buoyed by a higher methanol price. We are optimistic about the prospects for cash generation in the current operating environment and the stock remains a core holding.

Keyera and Gibson Energy outperformed in a rampant energy sector. The midstream companies, which own and operate pipelines, storage terminals and processing facilities, offer attractive long-term prospects, in our view, driven by their exposure to some of the most prolific basins in North America. Both stocks continue to offer compelling value with dividend yields of 6%, which we believe are secure.

Stock selection added value in healthcare as Anthem, Bristol Myers Squibb and Novo Nordisk delivered solid gains, backed by strong operating results. Imperial Brands outperformed in consumer staples.

Authorised Corporate Director's Report

Trinseo led the detractors amid concerns about higher natural gas prices weighing on input costs. Despite these challenges, the US company specialising in plastics and latex binders is making progress in its quest to become a higher value-added, more sustainable business. We support the company's strategic direction and continue to believe that the share price does not reflect its long-term potential.

abrdn drifted lower in financials. The financial community remains sceptical about the UK asset manager's growth ambitions, but we continue to believe that the valuation is distressed and the share price looks cheap relative to the sum of its parts.

Adidas (consumer discretionary) and Siemens (industrials) underperformed in a weak German market. Takeda (healthcare) declined in Japan.

Not owning Apple, NVIDIA and Tesla also provided a headwind for the fund's performance relative to the MSCI ACWI Index. Apple and NVIDIA are potential investment candidates because the technology companies have respectable dividend track records, but their valuations are demanding and we see more attractive opportunities elsewhere. Tesla does not pay a dividend and is therefore ineligible for our dividend growth approach.

Investment activities

We made 11 new purchases and 12 complete sales during the 12 months under review – a level of turnover consistent with our investment timeframe of three to five years. The number of holdings slipped to 42, compared to our historic range of 40 to 50.

The fund's exposure to technology increased as we initiated three new holdings in the semiconductor industry: Analog Devices, Broadcom and ASML. We bought Mastercard in digital payments, but the holding proved short-lived as we were unable to build a full position. We sold Mastercard as a source of cash. We also exited Cisco Systems after a strong run.

The weighting in consumer discretionary rose after we bought Adidas and VF Corp.

The healthcare exposure declined following the sale of Novo Nordisk. We also disposed of UnitedHealth and Roche to back our greater conviction in Anthem and Novartis. AstraZeneca was the only new purchase in the sector.

In consumer staples, we sold Procter & Gamble on valuation grounds, to be replaced later in the review period by Unilever, which we think offers an attractive yield opportunity.

The utilities weighting was reduced to zero following the sale of Enel and NextEra Energy.

We made three new purchases in financials, matched by three disposals. We bought Intact Financial, Marsh McLennan and Charles Schwab, and sold Arthur J Gallagher, St. James's Place and Travelers.

The fund's exposure to industrials was lower after Imperial Logistics was taken over.

Outlook

Russia's military intervention in Ukraine has led to heightened anxiety across financial markets, but we strongly believe that the increased volatility is presenting buying opportunities for investors with a long-term time horizon. We are mindful of the potential risks arising from persistent inflation and higher energy prices, but rather than second-guess the course of the global economy, we prefer to focus our attention on long-term company fundamentals and valuation.

Value's resurgence at the expense of growth in the current market environment underscores the importance of valuation. It is critical that we do not overpay for the growth we seek. Speculative areas of the market have seen their unrealistic expectations reined back, but valuations remain polarised. Being selective will be paramount.

Authorised Corporate Director's Report

We remain poised to take advantage of buying opportunities when they arise. Capitalising on these opportunities will ultimately determine fund performance in the years ahead and we remain optimistic about the future.

Stuart Rhodes

Fund manager

Financial highlights

Fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the fund price to fall as well as rise and you may not get back the original amount you invested.

The following charts and tables reflect the key financial information of a representative share class, Sterling Class 'A' (Accumulation) shares. As different share classes have different attributes, for example charging structures and minimum investments, please be aware that their performance may be different. For more information on the different share classes in this fund please refer to the Prospectus for M&G Global Dividend Fund, which is available free of charge either from our website at www.mandg.co.uk/prospectuses or by calling M&G Customer Relations.

Fund level performance

Fund net asset value as at	31.03.22	31.03.21	31.03.20
	£'000	£'000	£'000
Fund net asset value (NAV)	2,338,268	2,293,192	1,686,990

Performance since launch

To give an indication of how the fund has performed since launch, the chart below shows total return of Sterling Class 'A' (Accumulation) shares.

July 2008 = 100, plotted monthly
Chart date 1 April 2022

Source: Morningstar, Inc. and M&G

* Income reinvested

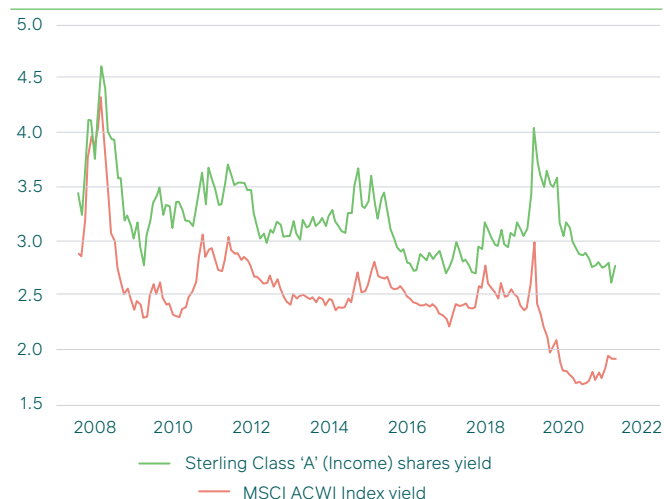

† Benchmark prior to 1 January 2012 was the FTSE World Index. Thereafter it is the MSCI ACWI Index.

Financial highlights

Historic yield

The chart below shows the historic yield of Sterling Class 'A' (Income) shares against that of a comparator benchmark.

Historic yield comparison from July 2008, plotted monthly
Chart date 1 April 2022

Source: Morningstar, Inc. and M&G

Historic yield: The historic yield reflects distributions declared over the past twelve months as a percentage of the mid-market price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions.

Distribution over ten years

The chart below shows the annual distribution of Sterling Class 'A' (Income) shares over 10 years.

Annual distribution over 10 years
Chart date 1 April 2022

Long-term performance by share class

To give an indication of the performance of the fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. Please refer to 'Specific share class performance' tables for the share class launch dates.

Share class	One year 01.04.21 % ^a	Three years 01.04.19 % pa	Five years 03.04.17 % pa	Since launch % pa

^a Not annualised

^b The benchmark prior to 1 January 2012 was the FTSE World Index. Thereafter it is the MSCI ACWI Index.

Financial highlights

Operating charges and portfolio transaction costs

We explain below the payments made to meet the ongoing costs of investing and managing the fund, comprising operating charges and portfolio transaction costs.

Operating charges

Operating charges include payments made to M&G and to providers independent of M&G:

- **Annual charge:** Charge paid to M&G covering the annual cost of M&G managing and administering the fund and the costs of third parties providing services to the fund.
For every £1 billion of a fund's net asset value, a discount of 0.02% will be applied to that fund's annual charge (up to a maximum of 0.12%).
- **Extraordinary legal and tax expenses:** Costs that specifically relate to legal or tax claims that are both exceptional and unforeseeable. Such expenses are uncommon, and would not be expected in most years. Although they result in a short-term cost to the fund, generally they can deliver longer term benefits for investors.
- **Ongoing charges from underlying funds:** Ongoing charges from underlying funds (excluding Investment Trust Companies and Real Estate Investment Trusts) will be rebated.

The operating charges paid by each share class of the fund are shown in the following performance tables. These charges do not include portfolio transaction costs or any entry and exit charges (also known as initial and redemption charges). The charging structures of share classes may differ, and therefore the operating charges may differ.

Operating charges are in line with the ongoing charges shown in the Key Investor Information Document, other than where there have been extraordinary legal or tax expenses, or an estimate has been used for the ongoing charge because a material change has made the operating charges unreliable as an estimate of future charges.

Portfolio transaction costs

Portfolio transaction costs are incurred by funds when buying and selling investments. These costs vary depending on the types of investment, their market capitalisation, country of exchange and method of execution. They are made up of direct and indirect portfolio transaction costs:

- **Direct portfolio transaction costs:** Broker execution commission and taxes.
- **Indirect portfolio transaction costs:** 'Dealing spread' – the difference between the buying and selling prices of the fund's investments; some types of investment, such as fixed interest securities, have no direct transaction costs and only the dealing spread is paid.

Investments are bought or sold by a fund when changes are made to the investment portfolio and in response to net flows of money into or out of the fund from investors buying and selling shares in the fund.

To protect existing investors, portfolio transaction costs incurred as a result of investors buying and selling shares in the fund are recovered from those investors through a 'dilution adjustment' to the price they pay or receive. The following table shows direct portfolio transaction costs paid by the fund before and after that part of the dilution adjustment relating to direct portfolio transaction costs. To give an indication of the indirect portfolio dealing costs the table also shows the average portfolio dealing spread.

Further information on this process is in the Prospectus, which is available free of charge on request either from our website at www.mandg.co.uk/prospectuses or by calling M&G Customer Relations.

as at 31 March	2022	2021	2020	Average ^a
Indirect portfolio transaction costs	%	%	%	%
Average portfolio dealing spread	0.16	0.12	0.18	0.15

^a Average of first three columns.

^b As a percentage of average net asset value.

^c In respect of direct portfolio transaction costs. Please see the section above this table for an explanation of dilution adjustments.

Specific share class performance

The following tables show the performance of each share class. All 'Performance and charges' percentages represent an annual rate except for the 'Return after operating charges' which is calculated as a percentage of the opening net asset value per share (NAV). 'Dilution adjustments' are only in respect of direct portfolio transaction costs.

The closing NAV per share shown may diverge from the highest and lowest share prices (used for dealing purposes) as at the balance sheet date due to accounting and valuation adjustments.

Historic yields for the current year are calculated as at 8 April 2022.

Financial statements and notes

Notes to the financial statements

1 Statement of compliance

The financial statements have been prepared in compliance with UK Financial Reporting Standard 102 (FRS 102) and in accordance with the Statement of Recommended Practice (SORP) for Authorised Funds issued by the Investment Association in May 2014 and amended in June 2017.

2 Summary of significant accounting policies

a. Basis of preparation

There are no material events that have been identified that may cast significant doubt on the Company's ability to continue as a going concern for at least the next twelve months from the date these financial statements are authorised for issue. The ACD believes that the Company has adequate resources to continue in operational existence for the foreseeable future and, following consideration of the impact of COVID-19 they continue to adopt the going concern basis in preparing the financial statements. The ACD has made an assessment of the fund's ability to continue as a going concern which is made as at the date of issue of these financial statements and considers liquidity, declines in global capital markets, investor intention, known redemption levels, expense projections, key service provider's operational resilience, and the impact of COVID-19.

The financial statements of M&G Global Dividend Fund are prepared on a going concern basis, under the historical cost convention as modified by the revaluation of certain financial assets and liabilities measured at fair value through profit or loss.

b. Functional and presentational currency

The functional and presentational currency of M&G Global Dividend Fund is UK sterling.

c. Exchange rates

Transactions in currencies other than each fund's functional currency are translated at the rate of exchange ruling on the date of the transaction and where applicable assets and liabilities are translated into the fund's functional currency at the rate of exchange ruling as at 12 noon on 31 March 2022 being the last business day of the accounting period.

d. Investments – recognition and valuation

The provisions of both Section 11 and Section 12 of FRS 102 have been applied in full. All investments have been designated as fair value through profit and loss and recognised initially at fair value, which is normally the transaction price (excluding transaction costs).

At the end of the reporting period all investments have been measured at their fair value using the prices and the portfolio holdings determined at 12 noon on 31 March 2022, being the last valuation point of the accounting period, as this is not materially different from a valuation carried out at close of business on the balance sheet date.

Where separate bid and offer prices are available, the bid price is used for investment assets and the offer price for investment liabilities. Otherwise, the single price or most recent transaction price is used. The methods of determining fair value for the principal classes of investment are:

- Equities which are traded on an active market are included at the quoted price, which is normally the bid price.

Financial statements and notes

- Equities traded on the Alternative Investment Market (AIM), whose liquidity cannot be guaranteed, are included at their quoted bid price as this represents the most objective and appropriate method of valuation.
- Collective investment schemes operated by the ACD are included at either their cancellation price for dual priced funds or their single price for single priced funds.
- Collective investment schemes operated by another manager are included at either their bid price for dual priced funds or their single price for single priced funds.
- Other equities which are unquoted or not actively traded on a quoted market are included at a value estimated by the ACD using an appropriate valuation technique.
- Exchange traded futures and options are included at the cost of closing out the contract at the balance sheet date.
- Over the counter equity options, credit default swaps, interest rate swaps, asset swaps and inflation swaps are included at a value provided by Markit Valuations Limited, an independent credit derivative price provider. Their fair value excludes any accrued interest in respect of derivatives where the income is revenue in nature.
- Forward currency contracts, for share class hedging and investment, are included at a value determined by reference to current forward exchange rates for contracts with similar maturity profiles.

e. Recognition of income and expenses

- Dividends, including ordinary stock dividends, from equity investments are recognised when the security is quoted ex-dividend.
- Distributions from collective investment schemes are recognised when the scheme is priced ex-distribution.
- Bank interest is recognised on an accruals basis.
- Underwriting commission is recognised when the issue takes place.
- Revenue from derivatives is recognised on an accruals basis.
- Fee rebates from investing in other collective investment schemes are recognised on an accruals basis.
- Expenses are recognised on an accruals basis.

f. Treatment of income and expenses

- Any increases or decreases in the fair value of investments and gains and losses realised on sales of investments are treated as capital and recognised in net capital gains/(losses).
- The value of any enhancement to a stock dividend is treated as capital.
- Ordinary equity dividends, including ordinary stock dividends are treated as revenue.
- Special dividends, share buy backs or additional share issues may be treated as revenue or capital depending on the facts of each particular case.
- Distributions from collective investment schemes are treated as revenue in nature, except for any element of equalisation, which represents the average amount of income included in the price paid for the collective investment scheme, which is treated as capital.
- Other interest income, such as bank interest is treated as revenue.

Financial statements and notes

- Underwriting commission is treated as revenue, except where the fund is required to take up all or some of the shares underwritten, in which case a proportion of the commission received is deducted from the cost of the shares and treated as capital.
- The treatment of the income on derivative contracts depends upon the nature of the transaction. Both motive and circumstances are used to determine whether the returns should be treated as capital or revenue. Where positions are undertaken to protect or enhance capital, and the circumstances support this, the returns are recognised in net capital gains; similarly where the motives and circumstances are to generate or protect revenue, and the circumstances support this, the returns are included within net revenue before taxation. Where positions generate total returns it will generally be appropriate to apportion such returns between capital and revenue to properly reflect the nature of the transaction.
- Expenses relating to the purchase and sale of investments are treated as capital; all other expenses are treated as revenue.
- Rebates of charges from holdings in collective investment schemes are treated as revenue or capital in accordance with the underlying scheme's distribution policy.

g. Tax

Dividends and similar income receivable are recognised at an amount that includes any withholding tax but excludes irrecoverable tax credits. Any withholding tax suffered is shown as part of the tax charge.

Tax is accounted for at the appropriate rate of corporation tax with relief for double taxation taken where appropriate. The tax accounting treatment follows the principal amounts involved.

Deferred tax is recognised in respect of temporary timing differences that have originated but not reversed by the balance sheet date. Deferred tax is measured on a non-discounted basis, at the average rate of tax expected to apply in the period in which it expects the deferred tax to be realised or settled. A deferred tax asset is only recognised to the extent that it is more likely than not that the asset will be recovered.

Marginal tax relief has not been taken into account in respect of expenses offset against capital.

h. Allocation of returns to share classes

The annual charge is directly attributable to individual share classes. All other returns are apportioned to the fund's share classes pro-rata to the value of the net assets of the relevant share class on the day that the income or expenses are recognised.

All available net revenue accounted for in accordance with the above policies and adjusted where relevant by any specific distribution policies set out in the notes to that fund's financial statements, is distributed to holders of Income shares or retained and reinvested for holders of Accumulation shares. Should expenses and taxation together exceed revenue, there will be no distribution and the shortfall will be met from capital.

Distributions which have remained unclaimed by shareholders for more than six years are credited to the capital property of the fund.

3 Risk management policies

The ACD is responsible for establishing, implementing and maintaining an adequate and documented risk management policy for identifying, measuring and managing all risks to which funds are or might be exposed.

The Company's investment activities expose it to various types of risk which are associated with the financial instruments and markets in which it invests; market risk, liquidity risk and counterparty credit risk.

Financial statements and notes

These financial statements are designed to enable users to evaluate the nature and extent of those risks and how they are managed.

The following risk management policies are applicable to the fund, with specific risk disclosures set out in notes 20 to 22 in this report.

a. Market risk

Market risk is the risk of loss resulting from fluctuations in the market value of positions in a fund's portfolio attributable to changes in market variables, such as interest rates, exchange rates, equity and commodity prices or an issuer's creditworthiness.

In relation to market risk, processes are applied that take account of the investment objective and policy of the fund. The fund is subject to an investment oversight process in accordance with the type and nature of the fund. In addition all funds are monitored for compliance within regulatory limits.

In measuring and monitoring market risk, the global exposure of a fund is calculated using a 'commitment' approach.

b. Commitment approach

The commitment approach is applied for funds investing only in traditional asset classes, namely equities, fixed income, money market instruments and collective investment schemes.

In addition, the approach is applied for funds which use or intend to use derivatives or instruments embedding derivatives, but only for efficient portfolio management purposes, or in a simple way not necessarily restricted to efficient portfolio management.

Under the commitment approach the global exposure of funds is measured and monitored using a commitment (adjusted notional) methodology.

Market risk is considered on a daily basis and forms the foundation of investment oversight analysis. This can include for each fund (but is not limited to) the analysis of factors such as fund concentration; style, geographical, industry and market capitalisation biases; active, systematic and specific risk measurements; active money; and beta characteristics.

c. Liquidity risk

Liquidity risk is the risk that a fund's holdings cannot be sold, liquidated or closed out at limited cost in an adequately short time frame and that the ability of the scheme to comply at any time with its obligation to sell and redeem shares is thereby compromised.

The overall liquidity profile for the fund is reviewed and updated regularly. The liquidity profile takes into account investment, cashflow and market liquidity considerations.

Investment liquidity considerations include an assessment of asset class liquidity conditions, liquidity of underlying holdings, portfolio construction and concentration, the scale of individual stock ownership and the nature of the investment strategy.

Cashflow liquidity is managed in the fund on a daily basis using reports that include subscription and redemption information as well as the impact of trading, derivative lifecycle events and corporate action activity. In addition to the daily reporting, the fund managers are provided with reporting that highlights the impact of reasonably predictable events in the portfolio, including an allowance for the potential future exposures that might result from derivative exposures.

Financial statements and notes

Market (or distribution-related) considerations include an assessment of asset demand, fund growth, client concentration and the persistency of the client base. Supplementary to this, market liquidity stress tests are carried out on a monthly basis for all funds.

Liquidity in funds is independently assessed and challenged through the internal governance process at M&G. Fund liquidity is modelled and compared against potential liability scenarios such as severe redemption or collateral calls and any funds with liquidity issues are flagged to the internal committee. Funds flagged to the internal committee are escalated and remedial action agreed. None of the funds have been escalated for remedial action.

d. Counterparty credit risk

Funds investing in derivatives are exposed to counterparty risk. This is the risk that the other party to the transaction fails to fulfil their obligations, either by failing to pay or failing to deliver securities. To minimise this risk, carefully selected, financially strong and well-established counterparties are selected following a thorough due diligence review and collateral is posted daily (in the form of cash or high-quality government bonds). Derivative positions are valued on a mark-to-market basis (revalued to reflect prevailing market prices) daily and collateral moves from one counterparty to the other to reflect movements in the unrealised profit or loss. As a result, the maximum loss to the fund would be limited to that day's price movements in affected derivatives contracts.

4 Distribution policy

In order to conduct a controlled dividend flow to shareholders, interim distributions will be at the fund manager's discretion, up to the maximum of the distributable income available for the period.

In determining the amount available for distribution to Income shares, the annual charge is offset against capital, increasing the amount available for distribution whilst restraining capital performance to an equivalent extent.

5 Net capital gains/(losses)

for the year to 31 March	2022 £'000	2021 £'000
Non-derivative securities	328,954	752,600

^b Average portfolio dealing spread at the balance sheet date.

7 Revenue

for the year to 31 March	2022 £'000	2021 £'000
Bank interest	0	1
Dividends from equity investments: non-taxable	74,796	81,871
Dividends from equity investments: taxable	1	3
Interest distributions	8	35
Rebate of ongoing charges from underlying funds	5	10
Total revenue	74,810	81,920

Financial statements and notes

8 Expenses

for the year to 31 March	2022 £'000	2021 £'000
Payable to the ACD or associate		
Annual charge	18,012	20,855
Other expenses		
Interest payable	60	88
Safe custody charge ^a	0	(18)
	60	70
Total expenses	18,072	20,925

Audit fees for the financial year ending 2022 were £11,000 (2021: £9,000) (including VAT), which are covered by the annual charge.

^a This amount relates to refunds received in respect of charges to the fund before the single annual charge took effect.

9 Taxation

for the year to 31 March	2022 £'000	2021 £'000
a) Analysis of charge in the year		
Corporation tax	0	0
Withholding tax	7,490	9,336
Deferred tax (note 9c)	0	0
Total taxation	7,490	9,336
b) Factors affecting taxation charge for the year		
Net revenue/(expense) before taxation	56,738	60,995
Corporation tax at 20%	11,348	12,199
Effects of:		
Dividends from equity investments: non-taxable	(14,959)	(16,374)
Current year expenses not utilised	3,611	4,175
Withholding tax	7,490	9,336
Total tax charge (note 9a)	7,490	9,336
c) Provision for deferred taxation		
Provision at the start of the year	0	0
Deferred tax in profit and loss account (note 9a)	0	0
Provision at the end of the year	0	0

The fund has not recognised a deferred tax asset of £138,492,000 (2021: £134,881,000) arising as a result of having excess management expenses and interest distributions. We do not expect this asset to be utilised in the foreseeable future.

Financial statements and notes

14 Contingent assets, liabilities and outstanding commitments

There were no contingent assets, liabilities or outstanding commitments at the balance sheet date (2021: same).

15 Shares in issue

The following table shows each class of share in issue during the year. Each share class has the same rights on winding up however they may have different charging structures as set out in note 16.

Share class	Opening 01.04.21	Issued	Movements Cancelled	Closing 31.03.22
Sterling				
Class 'A' Income	218,630,792	836,909	(60,975,167)	158,492,534
Class 'A' Accumulation	61,839,313	1,641,923	(17,845,720)	45,635,516
Class 'I' Income	256,056,095	1,813,904	(88,255,042)	169,614,957
Class 'I' Accumulation	166,991,748	3,286,468	(16,102,498)	154,175,718
Class 'PP' Income	110,060,619	157,955,368	(22,547,451)	245,468,536
Class 'PP' Accumulation	10,211,708	48,695,810	(4,727,604)	54,179,914
Class 'R' Income	6,039,238	559,001	(845,386)	5,752,853
Class 'R' Accumulation	8,824,199	570,684	(1,032,766)	8,362,117
Class 'X' Income	19,460,728	327,852	(1,798,540)	17,990,040
Class 'X' Accumulation	4,838,854	203,551	(284,835)	4,757,570

Financial statements and notes

16 Charging structure

The table below sets out the charging structure for each class of share. The charging structure is the same for both Income and Accumulation shares of each class.

Share class	Annual charge ^a %
Sterling	
Class 'A'	1.10
Class 'I'	0.70
Class 'PP'	0.60
Class 'R'	0.95
Class 'X'	1.10

^a The amounts shown are the maximum annual charge. M&G will apply a discount of 0.02% for every £1 billion of a fund's net asset value. This is assessed quarterly and implemented on a forward basis no later than 13 business days after quarter end.

17 Related parties

M&G Securities Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal on all the transactions of shares in the fund except with in specie transactions, where M&G Securities Limited acts as an agent. The aggregate monies received through issues, and paid on cancellations, are disclosed in the 'Statement of change in net assets attributable to shareholders' and note 10. Amounts due to/from M&G Securities Limited in respect of share transactions at the year end are disclosed in notes 11 and 13 where applicable.

Amounts paid to M&G Securities Limited in respect of the annual charge are disclosed in note 8. Amounts due at the year end in respect of the annual charge are disclosed in note 13.

At the balance sheet date, shareholders from within M&G plc, of which M&G Securities Limited is a wholly owned subsidiary, have holdings totalling 1.74% (2021: 1.85%) of the fund's shares.

18 Events after the balance sheet date

There were no events after the balance sheet date to disclose.

19 Fair value analysis

Financial instruments have been measured at their fair value and have been classified below using a hierarchy that reflects the significance of the inputs used in measuring their fair value:

Level 1: Unadjusted quoted price in an active market for an identical instrument

This includes instruments such as publicly traded equities, highly liquid bonds (e.g. Government bonds) and exchange traded derivatives (e.g. futures) for which quoted prices are readily and regularly available.

Level 2: Valuation technique using observable market data

This includes instruments such as over-the-counter (OTC) derivatives, debt securities, convertible bonds, mortgage-backed securities, asset-backed securities and open-ended funds which have been valued using models with observable market data inputs.

Financial statements and notes

Level 3: Valuation technique using unobservable inputs

This refers to instruments which have been valued using models with unobservable data inputs. This includes single broker-priced instruments, suspended/unquoted securities, private equity, unlisted closed-ended funds and open-ended funds with restrictions on redemption rights.

as at 31 March	Assets 2022 £'000	Liabilities 2022 £'000	Assets 2021 £'000	Liabilities 2021 £'000
Level 1	2,306,651	0	2,282,823	0
Level 2	0	0	0	0
Level 3	0	0	0	0
	2,306,651	0	2,282,823	0

20 Risk management policies

The general risk management policies for the fund are set out in note 3 to the financial statements on pages 30 to 32.

21 Market risk sensitivity

A five per cent increase in the value of the fund's investment portfolio would have the effect of increasing the return and net assets by £115,333,000 (2021: £114,141,000). A five per cent decrease would have an equal and opposite effect.

22 Currency risk sensitivity and exposure

A five per cent increase in the value of the fund's currency exposure would have the effect of increasing the return and net assets by £102,656,000 (2021: £99,271,000). A five per cent decrease would have an equal and opposite effect.

as at 31 March	2022 £'000	2021 £'000
Currency exposure in respect of the fund		
Australian dollar	113,583	108,508
Canadian dollar	336,503	296,408
Danish krone	35,351	74,024
Euro	109,113	79,655
Hong Kong dollar	39,214	24,086
Japanese yen	40,902	35,916
Norwegian krone	64	561
South African rand	28,939	43,814
Sterling	285,139	307,766

Taiwan dollar	55,035	42,683
US dollar	1,172,784	1,076,484
Total	2,338,268	2,293,192

Financial statements and notes

23 Dividend distribution tables

This fund pays quarterly ordinary distributions and the following table sets out the distribution periods.

Quarterly distribution periods

	Start	End	Xd	Payment
First interim	01.04.21	30.06.21	01.07.21	31.08.21
Second interim	01.07.21	30.09.21	01.10.21	30.11.21
Third interim	01.10.21	31.12.21	04.01.22	28.02.22
Final	01.01.22	31.03.22	01.04.22	31.05.22

The following tables set out for each distribution the rates per share for both Group 1 and Group 2 shares.

Group 1 shares are those purchased prior to a distribution period and therefore their income rate is the same as the distribution rate.

Group 2 shares are those purchased during a distribution period and therefore their distribution rate is made up of income and equalisation. Equalisation is the average amount of income included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to Income Tax. Instead, it must be deducted from the cost of shares for Capital Gains Tax purposes. The tables below show the split of the Group 2 rates into the income and equalisation components.

Sterling Class 'A' Income shares

Ordinary distributions for the year to 31 March	Income	Group 2 Equalisation	Group 1 & 2 Distribution

Other regulatory disclosures

Remuneration

In line with the requirements of the Undertakings for Collective Investment in Transferable Securities (UCITS) V, M&G Securities Limited is subject to a remuneration policy which is consistent with the principles outlined in the European Securities and Markets Authority guidelines on sound remuneration policies under the UCITS Directive.

The remuneration policy is designed to ensure that any relevant conflicts of interest can be managed appropriately at all times and that the remuneration of employees is in line with the risk policies and objectives of the UCITS funds managed by the UCITS Management Company. Further details of the remuneration policy can be found here: <https://www.mandgplc.com/our-business/mandg-investments/mandg-investments-business-policies>. The remuneration policy and its implementation is reviewed on an annual basis, or more frequently where required, and is approved by the M&G plc Board Remuneration Committee.

M&G Securities Limited is required under UCITS to make quantitative disclosures of remuneration. These disclosures are made in line with M&G's interpretation of currently available guidance on quantitative remuneration disclosures. As market or regulatory guidance evolves, M&G may consider it appropriate to make changes to the way in which quantitative disclosures are calculated.

The 'Identified Staff' of M&G Securities Limited are those who could have a material impact on the risk profile of M&G Securities Limited or the UCITS funds it manages and generally includes senior management, risk takers and control functions. 'Identified Staff' typically provide both UCITS and non-UCITS related services and have a number of areas of responsibility. Therefore, only the portion of remuneration for those individuals' services which may be attributable to UCITS is included in the remuneration figures disclosed. Accordingly the figures are not representative of any individual's actual remuneration.

The amounts shown below reflect payments made in respect of the financial year 1 January 2021 to 31 December 2021.

	Fixed Remuneration £000	Variable Remuneration £000	Total £000
Senior Management	497	1,157	1,654
Other Identified Staff	5,706	20,483	26,189

Swiss investor information

For funds registered in Switzerland we are required by FINMA to disclose the Total Expense Ratio (TER).

For this fund the TERs are the same as the operating charges disclosed in the fund's financial highlights section under 'Performance and charges'.

Glossary

Accumulation shares A type of share where distributions are automatically reinvested and reflected in the value of the shares.

Accumulation units A type of unit where distributions are automatically reinvested and reflected in the value of the units.

Asset Anything having commercial or exchange value that is owned by a business, institution or individual.

Asset allocation Apportioning a portfolio's assets according to risk tolerance and investment goals.

Asset class Category of assets, such as cash, company shares, fixed income securities and their sub-categories, as well as tangible assets such as real estate.

Bond A loan in the form of a security, usually issued by a government or company, which normally pays a fixed rate of interest over a given time period, at the end of which the initial amount borrowed is repaid.

Bond issue A set of fixed income securities offered for sale to the public by a company or government. If the bonds are sold for the first time, it is called a 'new issue'.

Bottom-up selection Selecting stocks based on the attractiveness of a company.

Bunds Fixed income securities issued by the German government.

Capital Refers to the financial assets, or resources, that a company has to fund its business operations.

Capital growth Occurs when the current value of an investment is greater than the initial amount invested.

Capital return The term for the gain or loss derived from an investment over a particular period. Capital return includes capital gain or loss only and excludes income (in the form of interest or dividend payments).

Cash equivalents Deposits or investments with similar characteristics to cash.

Charity Authorised Investment Fund (CAIF) An investment entity that is both a registered charity and an authorised investment fund. The CAIF must comply with charity law as well as financial services laws and regulations, and is usually treated as a registered charity for tax purposes.

Comparative sector A group of funds with similar investment objectives and/or types of investment, as classified by bodies such as the Investment Association (IA) or Morningstar™. Sector definitions are mostly based on the main assets a fund should invest in, and may also have a geographic focus. Sectors can be the basis for comparing the different characteristics of similar funds, such as their performance or charging structure.

Consumer Prices Index (CPI) An index used to measure inflation, which is the rate of change in prices for a basket of goods and services. The contents of the basket are meant to be representative of products and services we typically spend our money on.

Convertible bonds Fixed income securities that can be exchanged for predetermined amounts of company shares at certain times during their life.

Corporate bonds Fixed income securities issued by a company. They are also known as bonds and can offer higher interest payments than bonds issued by governments as they are often considered more risky.

Coupon The interest paid by the government or company that has raised a loan by selling bonds.

Credit The borrowing capacity of an individual, company or government. More narrowly, the term is often used as a synonym for fixed income securities issued by companies.

Credit default swaps (CDS) Are a type of derivative, namely financial instruments whose value, and price, are dependent on one or more underlying assets. CDS are insurance-like contracts that allow investors to transfer the risk of a fixed income security defaulting to another investor.

Credit rating An independent assessment of a borrower's ability to repay its debts. A high rating indicates that the credit rating agency considers the issuer to be at low risk of default; likewise, a low rating indicates high risk of default. Standard & Poor's, Fitch and Moody's are the three most prominent credit rating agencies. Default means that a company or government is unable to meet interest payments or repay the initial investment amount at the end of a security's life.

Credit rating agency A company that analyses the financial strength of issuers of fixed income securities and attaches a rating to their debt. Examples include Standard & Poor's and Moody's.

Credit risk Risk that a financial obligation will not be paid and a loss will result for the lender.

Glossary

Credit selection The process of evaluating a fixed income security, also called a bond, in order to ascertain the ability of the borrower to meet its debt obligations. This research seeks to identify the appropriate level of default risk associated with investing in that particular bond.

Credit spread The difference between the yield of a corporate bond, a fixed income security issued by a company, and a government bond of the same life span. Yield refers to the income received from an investment and is expressed as a percentage of the investment's current market value.

Default When a borrower does not maintain interest payments or repay the amount borrowed when due.

Defaulted bond When a bond issuer does not maintain interest payments or repay the amount borrowed when due.

Default risk Risk that a debtholder will not receive interest and full repayment of the loan when due.

Derivatives Financial instruments whose value, and price, are dependent on one or more underlying assets. Derivatives can be used to gain exposure to, or to help protect against, expected changes in the value of the underlying investments. Derivatives may be traded on a regulated exchange or traded over the counter.

Developed economy/market Well-established economies with a high degree of industrialisation, standard of living and security.

Dilution adjustments The dilution adjustment is used to protect ongoing investors against the transaction charges incurred in investing or divesting in respect of creations and cancellations. The dilution adjustment is made up of the direct and indirect transaction charges. In the financial statements the direct transaction charges as a percentage of average NAV will be disclosed. This percentage will take account of those direct transaction charges that have been recovered through the dilution adjustment leaving a percentage that just represents the costs incurred in portfolio management.

Distribution Distributions represent a share in the income of the fund and are paid out to Income shareholders or reinvested for Accumulation shareholders at set times of the year (monthly, quarterly, half-yearly or annually). They may either be in the form of interest distributions or dividend distributions.

Distribution yield Expresses the amount that is expected to be distributed by the fund over the next 12 months as a percentage of the share price as at a certain date. It is based on the expected gross income less the ongoing charges.

Diversification The practice of investing in a variety of assets. This is a risk management technique where, in a well-diversified portfolio, any loss from an individual holding should be offset by gains in other holdings, thereby lessening the impact on the overall portfolio.

Dividend Dividends represent a share in the profits of a company and are paid out to the company's shareholders at set times of the year.

Duration A measure of the sensitivity of a fixed income security, also called a bond, or bond fund to changes in interest rates. The longer a bond or bond fund's duration, the more sensitive it is to interest rate movements.

Duration risk The longer a fixed income security, also called a bond, or bond fund's duration, the more sensitive and therefore at risk it is to changes in interest rates.

Emerging economy or market Economies in the process of rapid growth and increasing industrialisation. Investments in emerging markets are generally considered to be riskier than those in developed markets.

Equities Shares of ownership in a company.

Exchange traded Usually refers to investments traded on an exchange, such as company shares on a stock exchange.

Ex-dividend, ex-distribution or XD date The date on which declared distributions officially belong to underlying investors.

Exposure The proportion of a fund invested in a particular share/fixed income security, sector/region, usually expressed as a percentage of the overall portfolio.

Fixed income security A loan in the form of a security, usually issued by a government or company, which normally pays a fixed rate of interest over a given time period, at the end of which the initial amount borrowed is repaid. Also referred to as a bond.

Floating rate notes (FRNs) Securities whose interest (income) payments are periodically adjusted depending on the change in a reference interest rate.

Foreign exchange The exchange of one currency for another, or the conversion of one currency into another currency. Foreign exchange also refers to the global market where currencies are traded virtually around the clock. The term foreign exchange is usually abbreviated as 'forex' and occasionally as 'FX'.

Glossary

Foreign exchange (FX) strategy Currencies can be an asset class in its own right, along with company shares, fixed income securities, property and cash. Foreign exchange strategy can therefore be a source of investment returns.

Forward contract A contract between two parties to buy or sell a particular commodity or financial instrument at a pre-determined price at a future date. Examples include forward currency contracts.

Fundamentals (company) A basic principle, rule, law, or the like, that serves as the groundwork of a system. A company's fundamentals pertain specifically to that company, and are factors such as its business model, earnings, balance sheet and debt.

Fundamentals (economic) A basic principle, rule, law, or the like, that serves as the groundwork of a system. Economic fundamentals are factors such as inflation, employment, economic growth.

Futures A futures contract is a contract between two parties to buy or sell a particular commodity or financial instrument at a predetermined price at a future date. Futures are traded on a regulated exchange.

Gilts Fixed income securities issued by the UK government.

Government bonds Fixed income securities issued by governments, that normally pay a fixed rate of interest over a given time period, at the end of which the initial investment is repaid.

Hedging A method of reducing unnecessary or unintended risk.

High water mark (HWM) The highest level that a fund's NAV (net asset value) has reached at the end of any 12-month accounting period.

High yield bonds Fixed income securities issued by companies with a low credit rating from a recognised credit rating agency. They are considered to be at higher risk of default than better quality, ie higher-rated fixed income securities but have the potential for higher rewards. Default means that a company or government is unable to meet interest payments or repay the initial investment amount at the end of a security's life.

Historic yield The historic yield reflects distributions declared over the past 12 months as a percentage of the share price, as at the date shown.

Income yield Refers to the income received from an investment and is usually expressed annually as a percentage based on the investment's cost, its current market value or face value.

Index An index represents a particular market or a portion of it, serving as a performance indicator for that market.

Income shares A type of share where distributions are paid out as cash on the payment date.

Income units A type of unit where distributions are paid out as cash on the payment date.

Index tracking A fund management strategy that aims to match the returns from a particular index.

Index-linked bonds Fixed income securities where both the value of the loan and the interest payments are adjusted in line with inflation over the life of the security. Also referred to as inflation-linked bonds.

Inflation The rate of increase in the cost of living. Inflation is usually quoted as an annual percentage, comparing the average price this month with the same month a year earlier.

Inflation risk The risk that inflation will reduce the return of an investment in real terms.

Initial public offering (IPO) The first sale of shares by a private company to the public.

Interest rate risk The risk that a fixed income investment will lose value if interest rates rise.

Interest rate swap An agreement between two parties to swap a fixed interest payment with a variable interest payment over a specified period of time.

Investment Association (IA) The UK trade body that represents fund managers. It works with investment managers, liaising with government on matters of taxation and regulation, and also aims to help investors understand the industry and the investment options available to them.

Investment grade bonds Fixed income securities issued by a company with a medium or high credit rating from a recognised credit rating agency. They are considered to be at lower risk from default than those issued by companies with lower credit ratings. Default means that a company or government is unable to meet interest payments or repay the initial investment amount at the end of a security's life.

Issuer An entity that sells securities, such as fixed income securities and company shares.

Glossary

Leverage When referring to a company, leverage is the level of a company's debt in relation to its assets. A company with significantly more debt than capital is considered to be leveraged. It can also refer to a fund that borrows money or uses derivatives to magnify an investment position.

Liquidity A company is considered highly liquid if it has plenty of cash at its disposal. A company's shares are considered highly liquid if they can be easily bought or sold since large amounts are regularly traded.

Long position Refers to ownership of a security held in the expectation that the security will rise in value.

Macroeconomic Refers to the performance and behaviour of an economy at the regional or national level. Macroeconomic factors such as economic output, unemployment, inflation and investment are key indicators of economic performance. Sometimes abbreviated to 'macro'.

Maturity The length of time until the initial investment amount of a fixed income security is due to be repaid to the holder of the security.

Modified duration A measure of the sensitivity of a fixed income security, called a bond, or bond fund to changes in interest rates. The longer a bond or bond fund's duration, the more sensitive it is to interest rate movements.

Monetary easing When central banks lower interest rates or buy securities on the open market to increase the money in circulation.

Monetary policy A central bank's regulation of money in circulation and interest rates.

Monetary tightening When central banks raise interest rates or sell securities on the open market to decrease the money in circulation.

Morningstar™ A provider of independent investment research, including performance statistics and independent fund ratings.

Near cash Deposits or investments with similar characteristics to cash.

Net asset value (NAV) A fund's net asset value is calculated by taking the current value of the fund's assets and subtracting its liabilities.

Ongoing Charge Figure The ongoing charge figure represents the operating costs investors can reasonably expect to pay under normal circumstances.

Open-ended investment company (OEIC) A type of managed fund, whose value is directly linked to the value of the fund's underlying investments.

Options Financial contracts that offer the right, but not the obligation, to buy or sell an asset at a given price on or before a given date in the future.

Over-the-counter (OTC) Whereby financial assets are traded directly between two parties. This is in contrast to exchange trading, which is carried out through exchanges set up specifically for the purpose of trading. OTC is also known as off-exchange trading.

Overweight If a fund is 'overweight' a stock, it holds a larger proportion of that stock than the comparable index or sector.

Payment date The date on which distributions will be paid by the fund to investors, usually the last business day of the month.

Physical assets An item of value that has tangible existence, for example, cash, equipment, inventory or real estate. Physical assets can also refer to securities, such as company shares or fixed income securities.

Portfolio transaction cost The cost of trading, such as brokerage, clearing, exchange fees and bid-offer spread as well as taxes such as stamp duty.

Preference shares Preference shares are a loan to a company that may be traded in the same way as ordinary shares, but generally have a higher yield and pay dividends on fixed dates. Preference shares have varying characteristics as to the treatment of the principal and the dividend payment, which includes ranking them above ordinary shares when it comes to dividend payments.

Principal The face value of a fixed income security, which is the amount due back to the investor by the borrower when the security reaches the end of its life.

Private placement An offer of sale of securities to a relatively small number of investors selected by the company, generally investment banks, mutual funds, insurance companies or pension funds.

Property Expense Ratio (PER) Property expenses are the operating expenses that relate to the management of the property assets in the portfolio. These include: insurance and rates, rent review and lease renewal costs and maintenance and repairs, but not improvements. They depend on the level of activity taking place within the fund. The Property Expense Ratio is the ratio of property expenses to the fund's net asset value.

Glossary

Real yield The return of an investment, adjusted for changes in prices in an economy.

Retail Prices Index (RPI) A UK inflation index that measures the rate of change in prices for a basket of goods and services in the UK, including mortgage payments and council tax.

Risk The chance that an investment's return will be different to what is expected. Risk includes the possibility of losing some or all of the original investment.

Risk management The term used to describe the activities the fund manager undertakes to limit the risk of a loss in a fund.

Risk premium The difference between the return from a risk-free asset, such as a high-quality government bond or cash, and the return from an investment in any other asset. The risk premium can be considered the 'price' or 'pay-off' for taking on increased risk. A higher risk premium implies higher risk.

Risk-free asset An asset that notionally carries no risk of nonpayment by the borrower such as a high-quality fixed income security issued by a government or cash.

Risk/reward ratio A ratio comparing the expected returns of an investment with the amount of risk undertaken.

Safe-haven assets Refers to assets that investors perceive to be relatively safe from suffering a loss in times of market turmoil.

Security Financial term for a paper asset – usually a share in a company or a fixed income security also known as a bond.

Share class Each M&G fund has different share classes, such as A, R and I. Each has a different level of charges and minimum investment. Details on charges and minimum investments can be found in the Key Investor Information Documents.

Share class hedging Activities undertaken in respect of hedged shares to mitigate the impact on performance of exchange rate movements between the fund's currency exposure and the investor's chosen currency.

Short position A way for a fund manager to express his or her view that the market might fall in value.

Short selling This often refers to the practice whereby an investor sells an asset they do not own. The investor borrows the asset from someone who does own it and pays a fee. The investor must eventually return the borrowed asset by buying it in the open market. If the asset has fallen in price, the investor buys it for less than they sold it for, thus making a profit. The contrary may also occur.

Short-dated corporate bonds Fixed income securities issued by companies and repaid over relatively short periods.

Short-dated government bonds Fixed income securities issued by governments and repaid over relatively short periods.

Sovereign debt Debt of a government. Also referred to as government bonds.

Sub-investment grade bonds Fixed income securities issued by a company with a low rating from a recognised credit rating agency. They are considered to be at higher risk from default than those issued by companies with higher credit ratings. Default means that a company or government is unable to meet interest payments or repay the initial investment amount at the end of a security's life.

Suspended Temporarily halting the trading of a listed security on the stock exchange. It can be voluntary (requested by the issuing company) or imposed by regulators. Typically, trading suspensions are introduced ahead of important news announcements, following technical glitches, or due to regulatory concerns.

Swing pricing Swing pricing is a method of protecting long-term shareholders in the fund from bearing the costs of transactions carried out by shorter-term investors. When investors buy or sell shares in the fund, the fund manager has to buy or sell underlying securities to either invest the cash obtained from investors, or to provide them with cash in exchange for their shares. Swing pricing essentially adjusts the fund shares' daily price to take into account the costs of buying or selling the underlying securities held by the fund. This ensures that transaction costs such as brokerage fees and administrative charges are borne by those investors who trade shares in the fund, not by those who remain invested in the fund. (Also see dilution adjustment).

Top-down investing An investment approach that analyses economic factors, ie surveys the 'big picture', before selecting which companies to invest in. The top-down investor will look at which industries are likely to generate the best returns in certain economic conditions and limit the search to that area.

Total return The term for the gain or loss derived from an investment over a particular period. Total return includes income (in the form of interest or dividend payments) and capital gains.

Treasuries Fixed income securities issued by the US government.

Glossary

Triple A or AAA rated The highest possible rating a fixed income security, also called a bond, can be assigned by credit rating agencies. Bonds that are rated AAA are perceived to have the lowest risk of default. Default means that a company or government is unable to meet interest payments or repay the initial investment amount at the end of a security's life.

UCITS Stands for Undertakings for Collective Investment in Transferable Securities. This is the European regulatory framework for an investment vehicle that can be marketed across the European Union and is designed to enhance the single market in financial assets while maintaining high levels of investor protection.

Unconstrained The term used to describe the mandate of a fund whereby the manager has the freedom to invest according to his or her own strategy, not being obliged to allocate capital according to the weightings of any index, for example.

Underlying value The fundamental value of a company, reflecting both tangible and intangible assets, rather than the current market value.

Underlying yield Refers to the income received by a managed fund, and is usually expressed annually as a percentage based on the fund's current value.

Underweight If a portfolio is 'underweight' a stock, it holds a smaller proportion of that stock than the comparable index or sector.

Unit trust A type of managed fund, whose value is directly linked to the value of the fund's underlying investments.

Unit/share type Type of units/shares held by investors in a trust or fund (unit/share types differ by features such as whether income is to be paid out as cash or reinvested on the payment date).

Unlisted/unquoted stocks Shares of ownership in companies that are not listed on a public exchange, known as private companies.

Valuation The worth of an asset or company based on its current price.

Volatile When the value of a particular share, market or sector swings up and down fairly frequently and/or significantly, it is considered volatile.

Volatility The degree to which a given security, fund, or index rapidly changes. It is calculated as the degree of deviation from the norm for that type of investment over a given time period. The higher the volatility, the riskier the security tends to be.

Warrant A security issued by a company that gives the holder the right to buy shares in that company at a specified price and within a certain timeframe.

Yield This refers to either the interest received from a fixed income security or to the dividends received from a share. It is usually expressed as a percentage based on the investment's costs, its current market value or its face value. Dividends represent a share in the profits of the company and are paid out to a company's shareholders at set times of the year.

Yield (equity) Refers to the dividends received by a holder of company shares and is usually expressed annually as a percentage based on the investment's cost, its current market value or face value. Dividends represent a share in the profits of the company and are paid out to a company's shareholders at set times of the year.

Yield (bonds) This refers to the interest received from a fixed income security and is usually expressed annually as a percentage based on the investment's cost, its current market value or its face value.

Yield (income) Refers to the income received from an investment and is usually expressed annually as a percentage based on the investment's cost, its current market value or face value.
