# Authorised Corporate Director's Report

The Authorised Corporate Director (ACD) of M&G Investment Funds (11) presents its interim report and unaudited financial statements for the six months ended 31 October 2024.

The unaudited financial statements of M&G Investment Funds (11), the Authorised Corporate Director's Reports including the portfolio statements, financial highlights and the unaudited financial statements and notes of each sub-fund are presented in their individual sections of this report as set out in the contents page.

Please note that an explanation of key investment terminology is available on our website at [mandg.com/private-investor/glossary](http://mandg.com/private-investor/glossary). A printed copy of the glossary is available upon request by calling customer services and administration as shown within the 'Investor information' section of this report.

## Company information

M&G Investment Funds (11) is an umbrella Open-Ended Investment Company (OEIC) and contains two sub-funds, hereinafter referred to as 'funds' in the rest of this report. The Company is a non-UCITS Retail Scheme (NURS) and, for the purposes of the AIFMD, qualifies as an alternative investment fund (AIF), as defined in the Collective Investment Schemes sourcebook, as issued (and amended) by the Financial Conduct Authority (FCA). This OEIC is an Investment Company with Variable Capital (ICVC) incorporated under the Open-Ended Investment Companies Regulations 2001. It is authorised and regulated by the FCA under the Financial Services and Markets Act 2000.

The Company was authorised on 1 October 2010, the M&G Episode Income Fund was launched on 11 November 2010 and the M&G Global Target Return Fund was launched on 13 December 2016.

The Company's principal activity is to carry out business as an OEIC. The Company is structured as an umbrella company, and different funds may be established by the ACD from time to time with the agreement of the Depositary and approval from the FCA. The funds are operated separately and the assets of each fund are

managed in accordance with the investment objective and policy applicable to that fund.

As at 31 October 2024, none of the funds held shares of the other funds within this OEIC.

A shareholder is not liable for the debts of the Company and will never be liable to make any further payment to the Company after paying the purchase price of the shares.

## Annual value assessment

An annual assessment report is available which shows the value provided to investors in each of M&G's UK-based funds. The assessment report evaluates whether M&G's charges are justified in the context of the overall service delivered to its investors. The latest report to 31 March 2024 can be found on our website at [mandg.com/investments/valueassessment](https://mandg.com/investments/valueassessment)

## Climate-related Financial Disclosures (TCFD)

We have produced TCFD reports in compliance with the FCA's rules on climate-related financial disclosures. The TCFD fund reports are designed to help you understand the impact these funds have on the climate and equally how climate change could influence the performance of these funds. The reports will also give you the ability to compare a range of climate metrics with other funds. To understand the governance, strategy and risk management that M&G has in place to manage the risks and opportunities related to climate change, please refer to the M&G Investments Management TCFD report.

These reports are available via the Sustainability Disclosures page on our website at [mandg.com/footer/sustainability-disclosures](https://mandg.com/footer/sustainability-disclosures)

## Important information

The events in Ukraine continue to bring uncertainty. The ACD continues to monitor the associated risks that are posed to the Company.

From January 2025 the operating charge figure will not include the underlying charges for closed-ended-funds, such as investment trusts and real estate investment trusts. There is no change to what you are currently being charged, this is a presentational change to align with the latest industry guidance issued by the Investment Association.

Please refer to the 'Investment review' section for further details on significant events during the period. Investment reviews may become quickly outdated in relation to ongoing economic and geopolitical events.

## Investor information

The Prospectus, Instrument of Incorporation, Key Investor Information Documents, costs and charges illustration, the latest annual or interim investment report and financial statements as well as a list of purchases and sales are available free of charge on request from the following address. The Instrument of Incorporation can also be inspected at our offices or at the office of the Depositary.

## Customer services and administration for UK clients:

Please remember to quote your name and M&G client reference and sign any written communication to M&G. Failure to provide this will affect your ability to transact with us.

Telephone: 0800 390 390 (UK only)

For security purposes and to improve the quality of our service, we may record and monitor telephone calls. You will require your M&G client reference. Failure to provide this will affect your ability to transact with us.

# Authorised Corporate Director's Report

## Authorised Corporate Director's Responsibilities

The Authorised Corporate Director (ACD) is required to prepare annual and interim reports for the Company. The ACD must ensure that the financial statements, contained in this report, for each of the funds are prepared in accordance with the Investment Association Statement of Recommended Practice for Financial Statements of UK Authorised Funds (SORP) and UK Financial Reporting Standards, and give a true and fair view of the net revenue or expenses and net capital gains or losses for the accounting period, and the financial position at the end of that period.

The ACD is required to keep proper accounting records, and to manage the Company in accordance with the Collective Investment Schemes sourcebook, as issued (and amended) by the FCA, the Instrument of Incorporation and the Prospectus, and to take reasonable steps for the prevention and detection of fraud or other irregularities. Additionally, the ACD is responsible for preparing the financial statements on a going concern basis unless it is appropriate to presume that the Company will not continue in operation.

## Directors' statement

This report has been prepared in accordance with the requirements of the Collective Investment Schemes sourcebook, as issued and amended by the FCA.

M&G Securities Limited  
19 December 2024

# Financial statements and notes

The financial statements for M&G Investment Funds (11) comprise the financial statements for each fund and the notes below.

## Notes to the financial statements

### Accounting policies

There are no material events that have been identified that may cast significant doubt on the Company's ability to continue as a going concern for a period of twelve months from the date these financial statements are authorised for issue. The ACD believes that the Company has adequate resources to continue in operational existence for the foreseeable future and they continue to adopt the going concern basis in preparing the financial statements. The ACD has made an assessment of each fund's ability to continue as a going concern which is made as at the date of issue of these financial statements and considers liquidity, declines in global capital markets, investor intention, known redemption levels, expense projections, key service provider's operational resilience.

The interim financial statements have been prepared on the same basis as the audited financial statements for the year ended 30 April, 2024. They are prepared under the historical cost convention, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice (SORP) for Authorised Funds issued by the Investment Association in May 2014 and amended in June 2017.

# Authorised Corporate Director's Report

For the purposes of these financial statements, the Prospectus dated 26 April 2024 has been used.

## Investment objective

The Fund aims to provide:

- a growing level of income over any three-year period; and
- capital growth of 2-4% per annum, net of the ongoing charge figure, over any three-year period.

There is no guarantee that the fund will achieve its objective over this, or any other, period. The income distributions and the value of your investment may rise and fall and investors may not recoup the original amount they invested.

## Investment policy

The fund manager adopts a flexible approach to the allocation of capital between asset classes in response to changes in economic conditions and the valuation of assets. Central to this approach is the identification of episodes, which are periods of time during which, in the fund manager's view, asset prices become over- or under-stated, relative to objective valuation measures, due to the emotional reaction of investors to events. These episodes can exist over both the short and medium term. The fund invests in transferable securities, fixed income assets (including, but not limited to, corporate bonds and government and public securities), warrants, cash, and near cash. Exposure to these assets, and to property, may be gained via collective investment schemes and derivatives (including equity index futures, currency forwards, interest rate swaps, and other liquid derivatives). The manager may seek to minimise currency risk through the combination of diversification and hedging.

Over 35% of the fund's assets may be invested in transferable securities or approved money-market instruments issued or guaranteed by a single state, local authority or public international body as listed hereafter:

- the Government of the United Kingdom (including the Scottish Administration, the Executive Committee of the Northern Ireland Assembly and the National Assembly of Wales);
- the Governments of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain and Sweden;
- the Government of Australia, Canada, Japan, New Zealand, Switzerland, USA;
- Eurofima, European Economic Community, European Bank for Reconstruction and Development, European Investment Bank, International Bank for Reconstruction and Development, International Financial Corporation.

Derivatives may also be used for efficient portfolio management purposes. More than 70% of the fund will be in sterling or hedged back to sterling.

## Investment approach

The fund manager seeks to achieve the fund's objectives whilst managing risk by investing globally across multiple asset classes, sectors, currencies and countries. Where the fund manager believes opportunities are limited to a few areas, the portfolio may be very concentrated in certain assets or markets. The fund manager will typically take investment positions in individual shares or bonds, but may also take positions at an index or sector level via derivatives.

The fund manager looks to generate a growing level of income by investing in assets that offer a regular income such as dividend-paying equities, corporate bonds and government bonds. The fund will typically invest 20-50% of its assets in equities, 40-80% in bonds and up to 20% in other assets, which can include convertibles.

# Authorised Corporate Director's Report

## Benchmark

None

The fund is actively managed and it has no benchmark. Investors can assess the performance of the fund by its objective to provide a growing level of income and capital growth of 2 to 4% per annum, both measured over any three-year period. The fund's annual report for each financial year will include details of the fund's performance in relation to its objective.

## Risk profile

For details of the risks associated with this fund, please refer to the Prospectus.

The following table shows the risk number associated with the fund and is based on Sterling Class 'A' shares.

### The above number:

- is based on the rate at which the value of the fund has moved up and down in the past and is based on historical data so may not be a reliable indicator of the future risk profile of the fund.
- is not guaranteed and may change over time and the lowest risk number does not mean risk free.
- has not changed during this period.

## Investment review

For the six months ended 31 October 2024

### Distribution summary

The fund distributed six monthly payments totalling 2.14p per Sterling Class 'A' Income share over the six months under review. This represents a decrease of 6.0% from the 2.28p distributed during the same period a year earlier. As at the end of the reporting period, the payout represented a yield (distributed income as a

percentage of the fund's share price on 31 October 2024) of 4.26%.

In respect of the Sterling Class 'I' Income shares, the fund distributed six monthly payments totalling 21.86p per Sterling Class 'I' Income share over the six months under review. This represents a decrease of 5.7% from the 23.18p distributed during the same period a year earlier. As at the end of the reporting period, the payout represented a yield (distributed income as a percentage of the share price at the end of the period) of 4.16%.

The distribution is subject to a variety of influences, including changes in the market environment, movements in currency and changes in the fund's tax status. Consequently, there is no guarantee that the fund will increase the income stream in every reporting period.

### Performance against objective

The M&G Episode Income Fund produced a positive total return (the combination of income and growth of capital) across all of its share classes in the six-month period under review.

The fund's distribution increased by 10.4% pa over the three-year period to 31 October 2024. Therefore, during that period, the fund met its objective of generating a growing level of income over any three-year period.

The fund's annualised capital growth fell by 3.1% pa over the three-year period to 31 October 2024. Therefore, it did not meet its objective of providing capital growth of between 2% and 4% on average each year over any three-year period.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

### Performance review

Bond market yields fell (and prices rose) for much of the review period, as central banks around the world delivered much-anticipated rate cuts. However, the decline in bond yields was not smooth, as investors reacted to 'hot and cold' news flow on economies and inflation, and to comments from policymakers, for clues on the future path of interest rates.

# Authorised Corporate Director's Report

Most notably, bond yields rose substantially in October, following a rebound in US labour market data and concerns that a Trump presidency, whose odds of victory had shortened over the month, might lead to further fiscal profligacy.

In contrast, equity markets delivered strong returns in the six months, despite losing steam around the middle of October. However, the positive total return from equities, masked tremendous volatility from time-to-time.

For example, in early August, following a weak US labour market report and strength in the yen, Japanese equities plunged. The fall seems to have been driven by correlated risk management practices, rather than by harmful economic data. Other global stock markets also declined, but by a smaller magnitude. Almost as quickly as they fell, global equity markets soon recovered.

September brought some further dramatic moves in markets, most notably in China where equities rallied dramatically in response to government stimulus measures.

Against this background, the fund delivered a positive total return across all of its share classes.

Fund performance was driven by equity and fixed income exposure. Within equities, the bulk of the gains came from holdings in the US. Positions in European shares made a much smaller contribution to returns, whereas Japanese holdings cost some performance.

Gains in fixed income, came from holdings of long-dated US Treasuries and UK gilts, and investment grade and high yield corporate bonds. Government bonds also proved to be a useful diversifier amid the volatility experienced in early August, reminding investors of the ability for long-dated government bonds to act as a useful source of portfolio insurance at times of stress.

Holdings of emerging market sovereign bonds, in South Africa, Colombia, Brazil and Mexico, as well as a supranational bond issued by the European Bank for Reconstruction (EBRD) and denominated in Turkish lira also supported performance. Cash and currency positions in aggregate held back returns.

## Investment activities

In May, we switched German bunds into US Treasuries. The spread between the two had widened since March, which gave us an opportunity to close our bund position. Duration was unchanged as a result of the trade - duration is a measure of a bond's sensitivity to interest rate changes. We also increased the number of holdings in the global high dividend yield basket and adjusted for sector/geographical biases that are inherent in dividend-paying stocks. The new exposure increased diversification of income.

In June, we switched out of a position in Turkish sovereign debt denominated in US dollars and maturing in 2028 and into a Turkish lira supranational bond issued by the EBRD maturing in 2025.

Early in July we reduced our target exposure to 10-year US Treasuries, with the proceeds being invested in six-month US Treasury bills, for a small pick-up in yield. We also added to an existing position in a Turkish lira denominated bond issued by the EBRD, which was funded by trimming existing emerging market bond names. Lira currency exposure increased correspondingly. This position subsequently proved to be useful during October when strong performance of the bond offset weaker performance elsewhere in our emerging market debt positions, highlighting the importance of having a diversified basket of holdings.

Later in July, we closed out a tactical position in China-related equities, which had performed very strongly since we added the holding earlier in 2024. Towards the end of the month we reduced the fund's aggregate equity exposure (the target weightings for the technology and communication services baskets were reduced and a new short position in the MSCI World Index was begun). At the same time, exposure to 30-year US Treasuries was increased and exposure to 10-year UK gilts was reduced.

In August we sold a Philippine peso-denominated supranational bond issued by the European Bank for Reconstruction, as we expected liquidity in the issue to diminish. We increased the duration of the fund by closing positions in 10-year US Treasuries and UK gilts

# Authorised Corporate Director's Report

and switching into 30-year US Treasuries. Duration is a measure of a bond's sensitivity to interest rate changes. The price of a bond with a lower duration, moves less than one with a bond with higher duration, when interest rates change.

Early in September and following meaningful underperformance by the sector, we added to our technology exposure. This was matched by a new short position (which seeks to profit from a fall in the price of an asset) in the S&P 500 Index, which had the effect of holding the fund's overall equity exposure steady. Towards the end of the month we closed a small short position in the MSCI World Index, which took the fund's overall equity exposure to neutral.

Early in October, we removed some high yield risk after a significant tightening of credit spreads (a measure of the difference between the yield of a corporate bond and a government bond of the same maturity) and rotated into a diversified basket of attractively-valued equities in the UK, Hong Kong, Brazil, Mexico and European banks. Towards the end of October, we reduced exposure to technology and added to a basket of healthcare stocks. The technology sector had meaningfully outperformed since we had added exposure in September.

## Outlook

We remain moderately constructive on equities, supported by recent economic resilience and the expectation of a clearly supportive fiscal and monetary backdrop. In particular, we see attractively valued opportunities in Asian and Latin American equities, as well as pockets within developed markets, such as European banks and UK stocks. While concentration at the index level remains a concern, the resilience and superb long-term track record of earnings growth from Big Tech should mitigate some of these worries.

We still like long-dated US Treasuries as what we consider to be an attractively priced form of portfolio insurance. Long-dated UK gilts also look interesting at current levels, in our view. A well-diversified basket of emerging market government bonds in local currency appears to us as an attractive source of medium-term

returns. Given how tight credit spreads are, we prefer to express constructive views elsewhere.

Cash real yields are elevated and attractive, in our view, as well as uncorrelated to other asset classes. Higher liquidity provides flexibility to respond to tactical opportunities.

## Fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the fund price to fall as well as rise and you may not get back the original amount you invested.

As different share classes have different attributes, for example charging structures and minimum investments, please be aware that their performance may be different.

For additional information, including monthly fund commentaries, fund facts, historic prices, distribution rates, performance information (including a range of performance graphs) and other documents, please visit our website at [mandg.com/investments](http://mandg.com/investments)

## Long-term performance by share class

To give an indication of the performance of the fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. Please refer to 'Comparative tables' for the share class launch dates.

Share class	Six months % <sup>a</sup>	Three years % pa	Five years % pa	Ten years % pa
<b>Sterling</b>				
Class 'A' Income	+3.4	+0.7	+1.9	+3.7
Class 'A' Accumulation	+3.4	+0.7	+1.9	+3.7
Class 'I' Income	+3.5	+1.0	+2.2	+4.2
Class 'I' Accumulation	+3.5	+1.0	+2.2	+4.2
Class 'PP' Income	+3.6	+1.1	+2.3	n/a
Class 'PP' Accumulation	+3.6	+1.1	+2.4	n/a
Class 'R' Income	+3.4	+0.8	+2.0	+4.0
Class 'R' Accumulation	+3.4	+0.8	+2.0	+4.0

<sup>a</sup> Not annualised.

## Comparative tables

'Operating charges' is calculated as a percentage of average net asset value and represents an annual rate. Where there is a change in the charging structure, you may see variances in the 'operating charges' between the comparative and current period figures.

# Financial statements and notes

## Notes to the financial statements

### Accounting policies

The financial statements have been prepared in accordance with the 'Accounting policies' set out on page 4.

### Distribution policy

In order to conduct a controlled dividend flow to shareholders, interim distributions will be at the fund manager's discretion, up to the maximum of the distributable income available for the period.

In determining the amount available for distribution to Income shares, the annual charge is offset against capital, increasing the amount available for distribution whilst restraining capital performance to an equivalent extent.

# Authorised Corporate Director's Report

For the purposes of these financial statements, the Prospectus dated 26 April 2024 has been used.

## Investment objective

The fund aims to achieve a total return (the combination of income and capital growth) of at least 2-4% per annum above the Sterling Overnight Index Average (SONIA), before any charges are taken, in any market conditions and over any three year period.

The fund aims to achieve this while seeking to minimise the degree to which the value of the fund fluctuates over time (volatility), while also seeking to limit monthly losses. Managing the fund in this way reduces its ability to achieve returns significantly above SONIA plus 2-4%.

There is no guarantee that the fund will achieve a positive return over three years, or any other period, and investors may not get back the original amount they invested.

## Investment policy

The fund has a highly flexible investment approach with the freedom to invest in different types of investment assets from anywhere in the world. The fund manager's approach combines in-depth research to determine the value of assets over the medium to long term, together with analysis of market reactions to events, to identify investment opportunities.

The fund may at any one time invest in the following asset classes: fixed income securities (including, but not limited to, corporate bonds and government and public securities), company shares, currencies, cash, near cash and deposits. The fund will mostly gain exposure to these assets by investing through derivatives, but may also invest directly, or by investing through other funds. Derivatives are financial contracts whose value is derived from an underlying asset. In cases where the fund manager believes that investment opportunities are limited to a few areas, or where available investment opportunities would add too much risk, the fund may hold a high level of cash. At any one

time the geographical range of the fund may be more focused rather than globally diversified.

The fund may also invest in other transferable securities and warrants (allowing the fund manager to buy stocks for a fixed price until a certain date) which may be from anywhere in the world and denominated in any currency.

The fund may take short positions (holding derivatives with the aim of delivering a positive return when the assets they are linked to fall in value) in markets, currencies, securities, and groups of securities. The fund also has the flexibility to gain exposure to investments exceeding the net asset value of the fund in order to increase potential returns in both rising and falling markets.

Over 35% of the fund's assets may be invested in transferable securities or approved money-market instruments issued or guaranteed by a single state, local authority or public international body as listed hereafter:

- the Government of the United Kingdom (including the Scottish Administration, the Executive Committee of the Northern Ireland Assembly and the National Assembly of Wales);
- the Governments of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain and Sweden;
- the Government of Australia, Canada, Japan, New Zealand, Switzerland, USA;
- Eurofima, European Economic Community, European Bank for Reconstruction and Development, European Investment Bank, International Bank for Reconstruction and Development, International Financial Corporation.

Derivatives can be used to meet the fund's investment objective and for efficient portfolio management.

# Authorised Corporate Director's Report

## Investment approach

The fund manager adopts a flexible approach to the allocation of capital between asset classes in response to changes in economic conditions and the valuation of assets, guided by a robust valuation framework. The fund manager seeks to respond to opportunities created by asset prices moving away from a reasonable sense of 'fair' value due to investors reacting emotionally to events. The blend of investments held in the fund is actively adjusted depending on where the fund manager sees the most value and to manage risks in order to limit monthly losses. The fund manager will seek to manage risk by combining diversified and relatively uncorrelated assets (which are assets affected by market conditions in different ways) and by employing derivative strategies to help protect or profit from falling markets. In cases where the fund manager believes that investment opportunities are limited to a few areas, or where the available investment opportunities would add too much risk to the fund, the fund may hold high levels of cash.

The fund manager believes that this approach has the potential to limit monthly losses to less than 3% in normal to stressed times and less than 6% in highly stressed times. The fund manager believes the fund has the potential to deliver an annualised volatility (the degree to which the value of the fund fluctuates over any 12-month period) of between 3% and 7%. The fund manager will ensure the fund's 1-month 99% VaR remains below 6%.

## Benchmark

SONIA + 2-4%

The benchmark is a target which the fund seeks to achieve. The rate has been chosen as the fund's benchmark as it is an achievable performance target and best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance objective and does not constrain the fund's portfolio construction.

The fund is actively managed. The fund manager has complete freedom in choosing which assets to buy, hold and sell in the fund.

For each share class the benchmark will be denominated or hedged into the relevant share class currency. The benchmark for each share class will be shown in its respective KIID.

## Risk profile

For details of the risks associated with this fund, please refer to the Prospectus.

The following table shows the risk number associated with the fund and is based on Sterling Class 'A' shares.

### The above number:

- is based on the rate at which the value of the fund has moved up and down in the past and is based on historical data so may not be a reliable indicator of the future risk profile of the fund.
- is not guaranteed and may change over time and the lowest risk number does not mean risk free.
- has not changed during this period.

## Investment review

For the six months ended 31 October 2024

### Performance against objective

The fund aims to provide a combination of capital growth and income of at least the Sterling Overnight Index Average (SONIA) plus 2-4% per annum (pa) before charges over any three-year period and in any market condition.

Prior to 20 July 2021, the fund's benchmark was 3-month GBP LIBOR plus 4% pa. The fund's historical benchmark performance is calculated using a weighted

# Authorised Corporate Director's Report

average of the two benchmarks according to the length of time each was applicable during the review period. The benchmark figure from 20 July 2021 onwards is calculated using SONIA plus 2% pa, which represents the lower threshold for the current benchmark.

Between 1 May 2024 (the start of the review period) and 31 October 2024, the fund delivered a positive return, but underperformed its benchmark, which returned +3.7% over the same period.

Over three years, the fund has produced positive returns across all share classes. All of the fund's share classes outperformed the benchmark, except the Sterling Class 'A' Accumulation share, which underperformed the benchmark. The benchmark returned +5.6% pa over the three-year period.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report. Please note that share class performance is shown after charges, while the benchmark for the fund is a comparison to be made before charges.

## Performance review

The fund delivered a positive return in the six-month period under review.

Bonds were the biggest driver of fund performance, generating positive returns in every month, with the exception of October. Cash and currency positions were also an important source of gains. Smaller contributions came from investments in renewable energy infrastructure stocks and our equity relative value trade, which consists of long positions in preferred markets and sectors, versus the short position held on US equities. (A long position is designed to benefit when the price of an underlying asset rises and a short position seeks to profit from a fall in the price of an asset).

Returns were complimented by tactical opportunities to exploit what we considered to be temporary weakness in bonds and equities throughout the review period.

Bond market yields fell (and prices rose) for much of the review period, as central banks around the world

delivered much-anticipated rate cuts. However, the decline in bond yields was not smooth, as investors reacted to 'hot and cold' news flow on economies and inflation, and to comments from policymakers, for clues on the future path of interest rates.

Most notably, bond yields rose substantially in October, following a rebound in US labour market data and concerns that a Trump presidency, whose odds of victory had shortened over the month, might lead to further fiscal profligacy.

In contrast, equity markets delivered strong returns in the six months, despite losing steam around the middle of October. However, the positive total return from equities, masked tremendous volatility from time-to-time.

For example, in early August, following a weak US labour market report and strength in the yen, Japanese equities plunged. The fall seems to have been driven by correlated risk management practices, rather than by harmful economic data. Other global stock markets also declined, but by a smaller magnitude. Almost as quickly as they fell, global equity markets soon recovered.

September brought some further dramatic moves in markets, most notably in China where equities rallied dramatically in response to government stimulus measures

## Investment activities

The abrupt sell-off in Mexican assets and the peso in June in response to the landslide victory of Claudia Scheinbaum as President elect was significant enough for us to respond with a tactical long position in Mexican equities (currency unhedged). We viewed investors' knee-jerk reaction as an attractive entry point, to a market where earnings trends had been positive, at a much-improved valuation.

We also added a small position in Indonesian equities, which had been significant laggards and were priced at close to their lowest valuations of the past decade. These additions were funded by selling a small position in the M&G Short Dated Corporate Bond Fund.

# Authorised Corporate Director's Report

In response to abrupt declines in the Japanese and Korean stockmarkets in early August, we added exposure to both markets. Then, with Japan and Korea having regained the majority of their losses by mid-August, we scaled back equity exposure in these areas and returned overall equity exposure to where it had been at the start of August.

The other major change in August, was to reduce duration in the fund, after yields had declined to lower levels compared to where positions were increased in April (before the start of the review period). Duration is a measure of the sensitivity of a bond to changes in interest rates. The longer a bond's duration, the more sensitive it is to interest rate movements.

Exposure to 5-year US Treasuries and 2-year UK Gilt receiver swaps was cut, taking duration from 4.3 years to 3.6 years. (An interest rate swap contract is one where an investor 'swaps' one stream of interest payments for another, over a fixed time period).

With bond yields declining further in September, we closed our positions in 5-year US Treasuries and 2-year UK Gilt receiver swaps. We also reduced positions in South African and Mexican bonds following a period of strong gains.

Within equities, our remaining positions in Hong Kong/China were removed in response to the very rapid gains in those markets. However, the fund retains an Asian value basket. We also increased our short position in the S&P 500 Index and began a short position in Australian equities. These moves took net equity exposure to very slightly negative by the end of September, which reflects our cautious stance on equities overall.

## Outlook

The current portfolio retains a relative value position in equities favouring non-US markets versus the US. We hold US and UK bond exposure, which we believe could perform well if economic data turns out to be weaker than the current consensus expectation. Overall portfolio exposures are accordingly light given the reduction in risk positions in September (proceeds into treasury bills), so returns will be muted (good or bad) in

the immediate future. We believe the fund is well placed to take advantage of any potential future volatility in markets should attractive opportunities arise.

As demonstrated during the review period, the market environment can quickly change. A key element to the performance of the fund will be our ability to respond to changes in the pricing of risk in markets, with the aim of taking advantage of tactical opportunities presented by market pricing.

When opportunities appear limited, there may be a low level of risk-taking in the fund, but as we see opportunities appear, we expect to increase position sizes with the aim of generating returns for the fund. The policies of the new US administration may bring volatility to markets and a source of opportunity to profit from, with macroeconomic factors likely to remain a key feature for markets in 2025.

## Fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the fund price to fall as well as rise and you may not get back the original amount you invested.

As different share classes have different attributes, for example charging structures and minimum investments, please be aware that their performance may be different.

For additional information, including monthly fund commentaries, fund facts, historic prices, distribution rates, performance information (including a range of performance graphs) and other documents, please visit our website at [mandg.com/investments](http://mandg.com/investments)

## Long-term performance by share class

To give an indication of the performance of the fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. Please refer to 'Comparative tables' for the share class launch dates.

Share class	Six months % <sup>a</sup>	Three years % pa	Five years % pa	Ten years % pa
<b>Sterling</b>				
Class 'A' Accumulation	+2.8	+5.4	+4.7	n/a
Class 'I' Accumulation	+2.9	+5.7	+4.9	n/a
Class 'L' Accumulation	+3.0	+5.9	+5.2	n/a
Class 'PP' Income	+3.0	+5.8	+5.0	n/a
Class 'PP' Accumulation	+3.0	+5.8	+5.0	n/a
<b>Benchmark<sup>b</sup></b>	<b>+3.7</b>	<b>+5.6</b>	<b>+4.9</b>	<b>n/a</b>

<sup>a</sup> Not annualised.

<sup>b</sup> Prior to 19 July 2021, the benchmark was the 3-month GBP LIBOR +4%. Thereafter it is the SONIA +2%.

## Comparative tables

'Operating charges' is calculated as a percentage of average net asset value and represents an annual rate. Where there is a change in the charging structure, you may see variances in the 'operating charges' between the comparative and current period figures.

## Notes to the financial statements

### Accounting policies

The financial statements have been prepared in accordance with the 'Accounting policies' set out on page 4.

### Distribution policy

In determining the amount available for distribution to Income shares, the annual charge is offset against capital, increasing the amount available for distribution whilst restraining capital performance to an equivalent extent.
