

Prudential With-Profits Fund

Factsheet

This document has been produced to provide factual information on Prudential's With-Profits Fund, and specifically, that part of the fund directly relevant to investments of this type, and should not be used as financial advice.

Key facts

Fund Size	£91.7 billion as at 31 March 2025
Prudential Financial Strength rating*	A+
Portfolio Manager	M&G Treasury & Investment Office (T&IO)
Investment Style	Prudent Active
Performance Objective	To offer competitive long term returns

*Standard & Poor's as at July 2024

Fund description

The fund aims to produce growth over the medium to long-term (5 to 10 years or more) while smoothing some of the ups and downs of short-term investment performance. The fund spreads investment risk by investing in a range of different asset types, which currently includes UK and international equities, property, fixed interest securities, index-linked securities and other specialist investments.

Fund breakdown

The asset mix is likely to vary in the future.

Source: Prudential as at 31 March 2025. Asset allocations are regularly reviewed and may vary, but will always be consistent with the fund objective.

All figures are as at 31 March 2025, unless otherwise stated.

Prudential risk rating

Lower to Medium

What is the risk rating?

- These risk ratings have been developed by Prudential to help provide an indication of a fund's potential level of risk and reward based on the type of assets which may be held by the fund. Other companies may use different descriptions and as such these risk ratings should not be considered as generic across the fund management industry.
- We regularly review our fund risk ratings, so they may change in the future. If, in our view, there is a material change in the fund's

Commentary

Financial markets experienced turbulence as investors reacted to President Trump's tariff campaign, fiscal shifts in Europe and a ground-breaking new Chinese AI model. In the bond market, rising risk aversion and recession fears drove US Treasuries higher. UK government bonds registered a modest gain. Concurrently, Germany's suspension of its so-called debt brake to increase defence spending pushed up government bond yields. Japanese government bond yields reached their highest levels since 2008. Corporate bonds were relatively resilient. Global equity markets were volatile. The US declined due to new tariff measures and growing concerns about valuations of big technology firms. The S&P 500 fell 4.3%, most significant quarterly drop since Q3 2022. Notably, the 'Magnificent Seven' group of mega-cap US tech stocks, which have driven the market lately, were weak and lost nearly US\$2 trillion.

In a reversal of recent trends, US equities trailed other regions. Proposals to ramp up European defence spending propelled regional equities. UK equities also began positively. Optimism about China's AI development boosted the MSCI Emerging Markets Index, which outperformed the declining MSCI World and S&P 500 indices. From a sector perspective, energy and financials led the gains, whereas information technology and consumer discretionary experienced the most significant declines. The US dollar declined against major currencies.

The M&G Treasury & Investment Office (T&IO) outlook is cautious as much uncertainty remains.

Underlying investment returns

Source: Prudential. The above are calendar year returns for the With-Profits Fund (before charges, tax and effects of smoothing).

The value of your policy will be sent out in your annual statement or is available on request. The value will depend on when you actually invested allowing for tax, charges and smoothing. The value could change by more or less than the underlying investment return of the overall fund.

Past performance is not a reliable indicator of future performance.

level of risk, for example due to a significant change to the assets held by the fund or in the way the fund is managed, we will provide information on the new risk rating. We recommend that you make sure you understand the risk rating of any fund before you invest.

- You will find this information at www.pru.co.uk/funds/prudential-corporate-pension-factsheets/.
- You should also consider discussing your decision and the appropriateness of a fund's risk rating with an adviser.

Prudential With-Profits Fund

Performance (applicable from 6 April 2025)

For investments in the With-Profits Fund, the value of the policy depends on how much profit the fund makes and how we decide to distribute that profit. Policyholders receive a distribution of profits by means of bonuses, or other methods as specified in the relevant policy documentation. There are two types of bonus, regular (or reversionary) and final (or terminal) bonus.

The performance figures shown are average overall annualised returns for contributions made on the dates specified. The returns include both regular and final bonuses added to a benefit paid at normal retirement date, but make no allowance for any applicable initial charges, allocation rates or early cash in charges (explicit charges).

Final bonus may vary and is not guaranteed. The rate of future bonuses cannot be guaranteed. The value of an investment can go down as well as up and the fund value in the future may be less than the payments you have made. Please bear in mind that inflation will reduce what you can buy in the future.

Please read the important information below and the Key Features document for the relevant contract.

The performance figures are declared by Prudential Assurance Company Limited, usually each February.

For the returns shown, it is assumed that 1, 3, 5 or 10 scheme revision dates have passed since the contribution was invested and that the contribution is realised in the scheme year ending on or after 15 March 2025.

Bonus Series	1 Year*	3 Years*	5 Years*	10 Years*
Prudential With Profits Fund Cash Acc DB	7.80%	3.65%	4.70%	5.10%

The value of your policy will be sent out in your annual statement or is available on request. The value will depend on when you actually invested allowing for tax, charges and smoothing. The value could change by more or less than the underlying investment return of the overall fund.

Past performance is not a reliable indicator of future performance.

Important information

Who manages the funds?

Prudential Assurance Company Limited holds the assets of the With-Profits Fund through custodians. Prudential has delegated the investment management of the fund through agreements with various investment managers including M&G Investments.

Can I get advice?

This factsheet should not be considered as financial advice and any changes to investment arrangements should be discussed with an adviser. It is not our intention to give an indication of how any particular funds will perform in the future. The commentary in this factsheet reflects the general views of the individual fund manager and should not be taken as a recommendation or advice as to how a specific market or fund is likely to perform.

Who is this factsheet for and what does it do?

This factsheet is intended for the trustees and advisers of schemes using the Prudential Cash Accumulation Defined Benefit contract. Its purpose is to provide an insight into how the fund(s) have performed over the period and is provided for information only. If you are not familiar with any of the investment terminology included on this factsheet, then please contact an adviser.

Other important information

If money invested in the With-Profits Fund is taken out at any time other than on death or normal retirement date, a Market Value Reduction (MVR) may be applied; this may have the effect of reducing the fund value.

For details on MVR and charges applicable to your investment, please refer to the Key Features document for the relevant contract. For a copy of the Key Features document, please contact your pensions department for scheme members or usual Prudential contact for trustees and advisers.
