Fund description

The fund offers the prospect of competitive long-term real returns whilst smoothing the peaks and troughs of day-to-day market movements. Investment returns are passed to policyholders through bonuses. The fund is invested in a diversified portfolio of UK and overseas shares, bonds, property and cash. A significant proportion of the fund is invested in shares and property which can be expected to produce attractive long term returns, but the return on these assets can be volatile and so the fund is actively managed to optimise the returns while controlling risk.

Underlying investment returns

Source: Prudential. The above are calendar year returns for the With-Profits Fund (before charges, tax and effects of smoothing). The value of your policy will be sent out in your annual statement or is available on request. The value will depend on when you actually invested allowing for tax, charges and smoothing. The value could change by more or less than the underlying investment return of the overall fund.

Prudential risk rating

Lower to Medium

What is the risk rating?

- These risk ratings have been developed by Prudential to help provide an indication of a fund’s potential level of risk and reward based on the type of assets which may be held by the fund. Other companies may use different descriptions and as such these risk ratings should not be considered as generic across the fund management industry.

Commentary

Global inflationary fears and Russia’s invasion of Ukraine dominated global financial markets. Rising inflation expectations weighed heavily on both bonds and shares, as investors fretted over the impact of higher prices and anticipated a much faster pace of interest rate rises from the major central banks. The conflict in Ukraine acted as another catalyst for commodity price rises. The added geopolitical uncertainty weighed heavily on many emerging markets, particularly those closest to the conflict zone. However, some markets further afield, such as in Latin America, and notable oil-producing nations performed well. Assets traditionally seen as safer bets, such as the US dollar and gold also benefited. The yields on government bonds in the UK, US and Europe rose sharply (prompting notable losses for many investors).

UK commercial property enjoyed a solid start. Despite the high level of COVID-19 cases, rising inflation and increasing interest rates, investors appear optimistic. We believe the reasons for the optimism are improving economic and employment growth – both key drivers of the demand for space – buoyant household savings, which are supportive of a retail and leisure recovery, and employees returning to the office. Trends of the past few months remain in play, with ongoing strong demand for industrials. Retail has seen a marked recovery. Demand for office space is also steadily gaining traction.

The M&G Treasury & Investment Office (T&IO) outlook is cautiously optimistic although much uncertainty remains.

Past performance is not a reliable indicator of future performance.

- We regularly review our fund risk ratings, so they may change in the future. If, in our view, there is a material change in the fund’s level of risk, for example due to a significant change to the assets held by the fund or in the way the fund is managed, we will provide information on the new risk rating. We recommend that you make sure you understand the risk rating of any fund before you invest. You will find this information at pru.co.uk/factsheets.

- You should also consider discussing your decision and the appropriateness of a fund’s risk rating with an adviser.
Prudential With-Profits Fund

Performance (applicable from 6 April 2022)

For investments in the With-Profits Fund, the value of the policy depends on how much profit the fund makes and how we decide to distribute that profit. Policyholders receive a distribution of profits by means of bonuses, or other methods as specified in the relevant policy documentation. There are two types of bonus, regular (or revisionary) and final (or terminal) bonus. The performance figures shown are overall annualised returns for contributions made on the dates specified. The returns include both regular and final bonuses added to a benefit paid at normal retirement date, but make no allowance for any applicable initial charges, allocation rates or early cash in charges (explicit charges). Final bonus may vary and is not guaranteed. The rate of future bonuses cannot be guaranteed. The value of an investment can go down as well as up and the fund value in the future may be less than the payments you have made. Please bear in mind that inflation will reduce what you can buy in the future.

Please read the important information below and the Key Features document for the relevant contract.

The performance figures are declared by Prudential Assurance Company Limited, usually each February.

With-Profits bonus series explained

Cash Accumulation With-Profits
Cash Accumulation MPP With-Profits is used solely by the oldest “pre 101” money purchase contracts for occupational pension schemes typically established from 1974.
Cash Accumulation AVC With-Profits is used solely by Additional Voluntary Contribution contracts as part of an occupational pension scheme, where the contracts were applied for before 15 March 2022.
Cash Accumulation AVC With-Profits Series 2 is used solely by Additional Voluntary Contribution contracts as part of an occupational pension scheme, where the contracts were applied for on or after 15 March 2022.
The Cash Accumulation AVC With-Profits and Cash Accumulation AVC With-Profits Series 2 bonus series are not used where voluntary contributions are paid through another Prudential group pension contract.

Important information

Who manages the funds?
Prudential Assurance Company Limited holds the assets of the With-Profits Fund through custodians. Prudential has delegated the investment management of the fund through agreements with various investment managers including M&G Investments.

Can I get advice?
This factsheet should not be considered as financial advice and any changes to investment arrangements should be discussed with an adviser. It is not our intention to give an indication of how any particular funds will perform in the future. The commentary in this factsheet reflects the general views of the individual fund manager and should not be taken as a recommendation or advice as to how a specific market or fund is likely to perform.
