## Income Drawdown Ratings Summary

We conclude the following ratings for the Prudential PruFund Cautious & Growth range:

PruFund Cautious	Low Sequencing Risk
PruFund Growth	Low Sequencing Risk

### Assessment

The defaqto methodology involves using both quantitative and qualitative inputs in order to rate a portfolio:

**Input 1** – worst 5% of expected tail value at risk returns based on the tactical asset allocation

**Input 2** – worst historic 12-month performance

**Input 3** – MiFID II costs (%)

Since our profiles are overlapping and not contiguous, we have some discretion as to whether a portfolio is rated in the upper or lower profile of the available data points.

## Investment Committee summary

Our analysis has been based on holdings data provided by Prudential.

Our assessment has been considered by our Investment Committee and has considered some of Prudential's suggestions when arriving at our ratings.

## Using sequencing risk assessments to meet client requirements

Defaqto provide three levels of sequencing risk:

- Low sequencing risk
- Medium sequencing risk
- High sequencing risk

The assessed sequencing risk levels should be used in conjunction with the term-based expected sustainable income levels projected by the investment solutions, based upon their asset allocation.

The term-based expected sustainable income levels are provided on both a nominal and real basis to assist with future income planning.

The above can then be aligned to client requirements within the Income Drawdown workflow.

The individual assessment pages that follow will detail all of the parameters highlighted above.

# Prudential PruFund Cautious

Assessed: Mar 2025  
Next review: Jun 2025

## Sequencing Risk

Tactical Tail Value at Risk (TVaR) @5%	-8.5%
MiFID II Cost (OCF plus transaction cost)	1.30%

Historic worst 12 month return	Return	Period
3 year	-2.5%	28/02/2023
