For more information on this fund or if you have any questions, please contact your Financial Adviser.

The PruFund range of funds aim to grow an investor's money over the medium to long term (5 to 10 years or more) while protecting investors from some of the short term ups and downs of direct stockmarket investments by using an established smoothing process.

The PruFund Growth Fund invests in the Prudential With-Profits Fund. Please refer to "Your With-Profits Plan – A guide to how we manage the Fund" (PruFund range of funds), reference WPG0031, for more information on how the fund works. For more information on our products, refer to your product Key Features document, available from your financial adviser.

Fund aim

Objective: The fund aims to maximise growth over the medium to long term by investing in shares, property, fixed interest and other investments. The fund currently invests in UK and international equities, property, fixed interest securities, index-linked securities and other specialist investments.

Asset allocation

Source: Prudential as at 31 January 2024. Asset allocations are regularly reviewed and may vary from time to time, but will always be consistent with the fund objective.

Fund manager commentary – Q4 2023

Alongside falling bond yields, equities also began to climb from late October as investor risk appetite improved. The FTSE World Index advanced 6.9% in the fourth quarter (in sterling), taking the annual return for 2023 to 17.2%. The US was one of the best-performing markets – the S&P 500 Index gained 11.7% (in US dollars) to end the year up 26.3%. European stockmarkets registered healthy gains, amid excitement about potential rate cuts. However, the UK trailed the broader global market. Share prices in Asia Pacific ex Japan and emerging markets also underperformed, mainly on account of weakness in China. From a sector perspective, real estate was one of the best performers, along with information technology, while energy stocks had the weakest performance. The US dollar weakened against major currencies including sterling after the Federal Reserve signalled it would start to cut rates this year. Oil prices fell 22% despite production cuts and concerns about potential supply disruptions resulting from the conflict in the Middle East.

The M&G Treasury & Investment Office (T&IO) outlook is cautious as much uncertainty remains.
