Assessment

The Defaqto methodology involves using both quantitative and qualitative inputs to risk rate a portfolio:

Input 1 - Forecast the portfolio's future volatility

Input 2 - Discussion with the portfolio manager

Since our profiles are overlapping and not contiguous, we have some discretion as to whether a portfolio is rated in the upper or the lower profile.

Our assessment has been considered by our Investment Committee, and has taken into account some of M&G Wealth's suggestions when arriving at our Risk Ratings.
