The M&G Charibond Charities Fixed Interest Fund (Charibond)

Sterling Class – Accumulation units ISIN no. GB00BK1KFG99

Managed by M&G Securities Limited

Objective and investment policy

The fund aims to provide a combination of capital growth and income, net of the Ongoing Charge Figure, that is higher than that of a composite index comprising one half UK government bonds and one half UK corporate bonds, over any five-year period.

The composite index is 50% ICE BoAML 1-15 Gilt Index and 50% ICE BoAML 1-15 Non Gilt Index.

Core investment: At least 70% of the fund is invested in high quality sterling denominated bonds issued by governments or companies.

Other investments: The fund may invest in non-sterling denominated bonds, other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly.

Derivatives usage: To reduce risk and costs.

Strategy in brief: The fund employs a disciplined approach to analyse and select each bond. It is combined with an assessment of economic fundamentals such as the outlook for economic growth, interest rates and inflation. The approach aims to identify bonds which are undervalued. The fund manager adjusts the portfolio's interest rate and credit exposure of the fund based on the economic outlook.

Benchmark: A composite index comprising:

- 50% of the ICE BoAML 1-15 Gilt Index
- 50% of the ICE BoAML 1-15 Non-Gilt Index

The benchmark is a target which the fund seeks to outperform. The composite index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction.

The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents.

The main risks that could affect performance are set out below:

- For any past performance shown, please note that past performance is not a guide to future performance.
- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
- Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.
- The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.
- In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
- Operational risks arising from a failure or delay in operational processes and systems, or the failure of a third party provider may affect the value of your investments. Where this results in compensation needing to be paid, this may be paid some time after the original loss is experienced.
- Further risk factors that apply to the fund can be found in the fund's Prospectus.
